Round 3: HackerRank MCQ Test (Cloud, Networking, Linux) (2Hrs)

Round 4: Interviews Tech 1

Round 5: Interviews Tech 2

Round 6: Managerial and Result

Eligibility:

Class 10 and Class 12- 75% or equivalent 75%

Must have a Minimum Cgpa- 7.5

No edu. Gaps allowed.

CS/IT group, ECE, EN

No live backlogs.

One of the top professional services firms in the world, Cognizant transforms clients' economic, operating, and technological models for the digital age. Clients may design, create, and manage more creative and effective enterprises with the assistance of its unique industry-based consultative approach. Cognizant, a Nasdaq-100 company with its headquarters in the United States, is number 185 on the Fortune 500 and has been routinely recognized as one of the world's most admired businesses for the past 11 years. It is additionally ranked 74th on Forbes' 2018 Best Employers for Women list.

CTC: GenC - 4 LPA

GenC Next - 6.75 LPA

Selection Process: The recruitment test consists of three rounds.

Round 1: Online Assessment This round will have a total of 61 questions, and 240 minutes

It consists of 5 sections- Aptitude, Reasoning, English

Quantitative Aptitude: 24 Questions, 35 minutes

Logical Reasoning: 25 Questions, 35 minutes

Verbal Ability: 1 Question, 30 minutes

Automata Fix: 7 Questions, 20 minutes

Coding: Stage 1 - 2 Question, 40 minutes

Stage 2 - 2 Question, 80 minutes

Round 2: Programming Skills 4 coding questions, 120 minutes.

Round 3: Gen C Next or Gen C interview. Questions will be based on Technical, Cognitive Abilities, and Right Attitude.

Note: Candidates who successfully clear round 2 will be eligible for the GenC Next Interview. Candidates who fail to clear round 2 will be headed toward the Gen C interview round.

Job title: Engineer Trainee

Location: Bengaluru, Chennai, Coimbatore. Candidates must be flexible to relocate to any Cognizant work locations as per the business requirement & demand.

Job description: IT Service Desk has witnessed significant transformations due to technological advancements. Today, many organizations leverage AI chat bots to automate and streamline their

support processes. AI chat bots use natural language processing to provide instant responses to common user queries and handle simple tasks, reducing the workload on human analysts. Robotic Process Automation (RPA) is also gaining traction, allowing repetitive and rule-based tasks to be automated, freeing up analysts' time for more complex issues.

- Provide first-line technical support and assistance to end-users, addressing their IT-related issues and enquiries, log and track all support tickets, ensuring accurate documentation and timely resolution of problems.
- Troubleshoot hardware and software problems, performing diagnosis and resolving technical issues to minimize downtime, collaborate with other IT teams to escalate complex issues and ensure prompt resolution and to maintain knowledge base articles and documentation to enhance self-service options and facilitate efficient problem-solving.

Compensation: INR 4,00,000 per annum

Role expectations:

- Associate should be client focused and able to work with users from different communities and cultures across the globe.
- Ability to have flawless communication (verbal and written) with our clients and possess sound technical knowledge.
- Work in shifts and work from the office.

Support available from Cognizant (post joining as Full Time Employee)

- Night shift allowance will be paid by the project.
- Cognizant provides cabs for pick-up and drop, ensuring safety and comfort.
- Timely rewards and recognition for top performers.

If you are passionate about customer service, possess strong technical skills, and thrive in a fast-paced environment, then this role is for you.

Eligibility Criteria:

- 2024 Batch of B.E/B.Tech of any branch (UG full time degree).
- At the time of registration, consistent academic record of a minimum of 60% in X, XII, Diploma, UG & PG with no standing arrears in current education.
- At the time of joining, all recruits need to have a minimum 60% aggregate in the pursuing degree with no standing arrears.
- No Active Live or dead Backlog allowed
- Any Education Year Gap is not allowed
- Flexible to relocate to anywhere in India, work in any shift / technology / domain, including work from office location basis business requirements.
- Opportunities are open to Indian nationals / OCIs who are currently residing in India.

Accenture

Accenture is an Irish-domiciled multinational company that provides consulting and professional services. A Fortune Global 500 company, it reported revenues of \$44.33 billion in 2020 and had 569,000 employees. In 2015, the company had about 150,000 employees in India, 48,000 in the US, and 50,000 in the Philippines. Accenture's current clients include 91 of the Fortune Global 100 and more than three-quarters of the Fortune Global 500.

CTC: Associate Software Engineer - 4.5 LPA

- Extensive training before deployment
- Project exposure from the first month of joining
- 24-months learning program to become full-stack in a chosen technology
- Faster career progression opportunities

Associate Software Engineer - 6.5 LPA

- Opportunity to get deployed in hand-picked complex assignments in emerging technologies
- End-to-end exposure from front-end, back-end, middle layer
- Well-defined learning journey with coaching and mentorship to grow as an expert

Selection process: The process Consists of 3 Rounds

Round 1: Online assessment consists of two-stage

Stage 1: Cognitive Ability and Technical

English: 17 Questions

Quantitative: 17 Questions

Reasoning: 15 Questions

MS Office: 11 Questions

Networking: 9 Questions

Pseudocode: 17 Questions

Coding – 2 Questions, 45 Minutes

Stage 2: Communication Assessment – 20 Minutes – Medium Difficulty

Round 2: Technical interview

Round 3: HR Interview

Eligibility criteria:

- Minimum criteria – Any engineering stream of B.E/B.Tech/ME/M.Tech or MCA or MSc (CS/IT) with year of passout being 2027.
- Having Class 10 and Class 12- 60% or equivalent 60%
- Having a minimum Cgpa of 6.00
- No active or dead backlogs during application and/or during onboarding.
- No edu. Gaps allowed.
- Candidate should have completed the relevant degree (eligible for this job role) in the stipulated duration of the degree. There should be no gaps during the course of your degree. E.g. candidate must complete the 4-year B. Tech course in 4 years.
- Candidate should not have appeared for Accenture Recruitment assessment/interview process in the last three months.
- Candidates must be eligible to work in India by citizenship/ have relevant work permit documents. Please note that Bhutan and Nepal nationals can work in India without a need for obtaining a work visa. All other foreign nationals require work visa or an Overseas Citizenship of India (OCI) or Person of Indian Origin (PIO) card to work in India

Capgemini :

Desired Competencies:

- **Communication:** Strong interaction skills with partners.
- **Collaboration:** Good interpersonal and teamwork abilities.
- **Flexibility:** Adapt to multiple technologies, locations, and travel.
- **Initiative:** Work independently and manage multiple tasks.
- **Other Skills:** Strong analytical and problem-solving abilities.

CTC: Analyst: 4.25 (4 LPA + 25k one-time incentive)

Analyst (Differential Hiring): 5.75 (5.5 LPA + 25k one-time incentive)

Senior Analyst: 7.5 LPA

Selection Process: The recruitment process consists of six rounds.

Round 1: Technical Assessment

Pseudocode 30 Questions (30 Min)

Write logic: 7 Questions

Write Output: 23 Questions

Round 2: English Communication Test 30 Questions (30 Min)

Topics: FIB, complete the sentence, spelling errors, synonyms, reading comprehension, para jumbled sentences, Synonyms/Antonyms, Indirect Direct Speech

Round 3: Game-Based Test 30 Questions (30 Min)

Topics: Grid challenge: find symmetry and select the correct order of pattern by seeing it once Deductive Logical Thinking, Inductive Logical Thinking, Motion Challenge, Switch challenge, Digit Challenge

Round 4: Behavioral Round 100 Questions

There will be no time limit for the round, but it is a mandatory one for everyone. This round helps them understand the innate profile of the candidate.

Round 5: Technical Round (20 Min)

Round 6: HR Interview (10 Min)

Eligibility:

No edu. Gaps allowed

CS/IT group, ECE, EN

No live backlogs.

Note: Candidates must have an active DigiLocker account and active mobile number linked with their Aadhar Number while applying for this job. Refer to attached pdf for a detailed walk-through of the process.

Larsen & Toubro Infotech Ltd is a global technology consulting and digital solutions company helping more than 300 clients succeed in a converging world. With operations in 30 countries and a team of more than 27000 employees, L&T Infotech is differentiated by its unique Business-to-IT Connect. Larsen & Toubro Infotech was formerly known as L & T Information Technology Limited.

The company is headquartered in Mumbai, India. It has additional offices in Pune, Chennai, Mysore, Bangalore, and Hyderabad, India. Larsen & Toubro Infotech Limited operates as a subsidiary of Larsen & Toubro, Ltd. Larsen & Toubro Limited operates as a technology, engineering, construction, and manufacturing company worldwide.

Key Persons:

Chairman: A. M. Naik

Chief Executive Officer and Managing Director: Debashis Chatterjee

Selection process:

Round 1: Online Assessment

Technical: MCQ 40 Questions (40 Min)

Coding:

Level 1 – 1 Question (30 Min) @ **Rs. 5 LPA**

Level 2 - 1 Question (45 Min) @ **Rs. 6.5 LPA** (on completion of level 1)

Level 3 - 1 Question (45 Min) @ **Rs. 8 LPA** (on completion of level 1 & level 2)

Round 2: Technical Interview

Round 3: HR Interview

Role: Graduate Engineer Trainee (GET)

Applications are invited from all eligible students in following disciplines:

- Civil
- Electrical / EEE
- Industrial
- Mechanical

Eligibility:

- 4 year / 8 semester Degree (full-time) course (students expecting to graduate by 30th June 2026) after 10+2 / 10+Diploma.
- The Aggregate for 10th,12th / Diploma, B.E. / B. Tech / B. Arch (5 Years/10 Semesters) should be more than or equal to 65%.
- No backlogs (past or live) during B.E. / B. Tech / B. Arch Course. All subjects/papers should be cleared in the first attempt only.
- Any subject/paper appeared and not cleared in the first attempt is considered a backlog.
- Post 10th Standard.
- 12th Standard should have been completed within 2 years (or)
- Diploma should have been completed within 3 years, as applicable.
- B. E / B. Tech to be completed in 4 years if done after 12th and in 3 years if done post Diploma.
- Should be an Indian national.

The company reserves the right to alter the requirements & eligibility criteria.

Compensation:

Posting Category CTC Per Annum

Office Based Posting Rs. 6,00,000/-

Project Site Based Posting Rs. 6,57,000/-

Additionally, local transportation and canteen facilities are available based on the place of posting, governed by the prevailing guidelines thereunder.

Selection Process:

Selection process consists of following steps:

1. Online Test: (completely remote proctored)
 - Aptitude Test (Analytical Ability, Verbal Ability and Numerical Ability) & Technical Test.
2. Interview (including extempore) for candidates clearing the Online Test.
3. Pre-employment medical test for candidates as per the guidelines provided by our Chief Medical Officer

**Job Role:**

1. **Specialist Programmer:** As an Infosys programmer in an SP role, you are expected to work in high end projects using technologies like Machine Learning and Artificial Intelligence. Some of the technologies that you should know before getting into Infosys SP role include:
 - Functional Programming– Scala, Akka
 - Java Microservices– Spring Boot, JEE
 - NoSQL and Scripting – ReachJS, Angular JS, MongoDB
 - Big Data and ML– Hadoop, Azure ML,
 - DevOps- Jira, GIt, JenKins

CTC: 9.5 LPA

Selection Process:

Round 1: Online Assessment This round will have a total of 3 coding questions, and 180 minutes. It consists of 3 levels- Easy , Medium , Hard .

Round 2: Onsite Technical Interview

Round 3: Culture fit Interview.

2. **System Engineer :** A System Engineer at Infosys is responsible for the design, development, implementation, and maintenance of systems that support the company's IT infrastructure

CTC: 3.6 LPA

Selection Process:

Round 1: In Campus Assessment. It consists of 7 sections-

- Mathematical Ability
- Reasoning Ability
- Verbal Ability
- Pseudo Code
- Puzzle Solving
- English Ability
- Essay Writing

Round 2: In Campus interviews, 20-30 minutes

Eligibility:

- All percentages/CGPA should be a simple average for all subjects/semesters/years, including electives, optional subjects, additional subjects, practical subjects and languages.
Class 10 and Class 12- 60% or equivalent 60%
Diploma (if applicable) - 58% or equivalent 58%
B.E./B. Tech - 60% or equivalent 60%
- In case the candidate has done both Class 12 and Diploma, the best of the two is taken into consideration.
- No active backlogs are allowed.
- Candidate should be willing to relocate to any location as required by Infosys.
- Candidate should be willing to work in different technologies as required by Infosys.

At Amadeus, fresh graduates bring new perspectives and are seen as key contributors to the organization's technical and leadership growth. With Amadeus processing millions of transactions daily, system reliability and performance are critical. We ensure customer satisfaction by delivering on their needs effectively.

Fresh graduates are absorbed into various divisions based on their skills and interview evaluations. To prepare them, all graduate engineers undergo an intensive 6–8 week training program, equipping them with the technical skills required for their roles.

Designation: Software Engineer

CTC: 12,62,218/-

Location: Bangalore/Pune

Skill set 1: Java/J2EE

A Java/J2EE developer is primarily a Back-end developer at Amadeus. You will be working on high volume production systems for the development and maintenance of Booking Engine which is a single set of code across a range of Amadeus E-Commerce products. This code is very critical because a slight error might block the airlines/travel agents for processing the booking or ticketing.

A Software developer is involved in many activities like:

- Define user requirements for development or improvement of software solutions
- Design technical solutions and perform feasibility studies
- Innovate: Think out of the box and practice innovation in his/her daily tasks. Propose and develop innovative solutions to the problems.
- Propose viable technical solutions to Product Management and users for validation
- Conduct unit, package and performance tests of the software and ensure a level of quality
- Design and implement databases as necessary
- Produce software documentation for the application and issue it
- Support the end user in the Production phase by debugging existing software
- solutions in response to Problem Tracking Records and Change Requests issued from
- Product Management or Product Definition

Main technical expertise on which the candidate will be trained on:

- Core Java with J2EE experience

- JUnits, Design Patterns, Struts, Spring MVC or any other framework
- JSPs, Servlets, EJBs, DB, XML, WebServices etc. WebLogic, Ant/Maven

Skill set 2: Java/UI

A UI developer works on a presentation layer which is the layer mostly exposed to the customer. The more sturdy and intuitive it is; the more satisfied our customer is. The skills which a candidate develops are very niche and give them a clear advantage over other technical profiles. An engineer who can think UI and brings in innovation in his daily work. A very demanding position with skill set varying:

- JQuery/ExtJS/YUI/DOJO or a similar JS framework
- DataBase, ClearCase, WebLogic, Ant/Maven etc
- JavaScript, OOJS CSS, HTML, AJAX, DOM, JSPs etc
- Core Java/ J2EE experience is desirable

Skill set 3: C/C++

There are multiple work streams in Amadeus Labs, Bangalore who are focusing on core work areas where we need expert C/C++ developers. A Software developer is involved in many activities like:

- Define user requirements for development or improvement of software solutions
- Design technical solutions and perform feasibility studies
- Innovate: Think out of the box and practice innovation in his/her daily tasks. Propose and develop innovative solutions to the problems.
- Propose viable technical solutions to Product Management and users for validation
- Conduct unit, package and performance tests of the software and ensure a level of quality
- Design and implement databases as necessary
- Produce software documentation for the application and issue it
- Support the end user in the Production phase by debugging existing software solutions in response to Problem Tracking Records and Change Requests issued from Product Management or Product Definition

Technical/Technical Skills

- UNIX/ Linux, shell scripting
- Strong knowledge of OOPS and coding with C++, design-patterns.
- Database modeling, Oracle, Oracle BI, optimization techniques.
- Good knowledge of development of a distributed system and of distributed algorithms

- Experience of Oracle environment and optimization techniques is a plus
- Experience in multithreaded programming is a plus

Skill Set 4 :Dev Ops

The DevOps engineer plays a key role to implement and support innovative solutions for operational requirements. The scope of the role will encompass process automation solutions for the highly demanding Amadeus operational business domain.

The DevOps Engineer will be involved in activities like

- Building DevOps CI/CD pipeline using relevant tools
- Experience with systems and IT operations
- Performing frequent, incremental code testing and deployment
- Build various version of scripts/codes and release them on time, maintain source repositories, different branches
- Monitor the application, quickly resolve if any issue on production environments
- Involve in Release Management, Source code management, Software configuration management.

Technical aspects on which you will gain expertise-

- Ability to use and adapt a variety of open source technologies and tools (Puppet, Ansible, IAAS,
- PAAS, Kubernetes)
- Ability to code Hadoop related code as map/reduce
- Ability to code and script (java, C++, php, python, perl, Ruby...)
- Linux servers, Cloudera's Hadoop distribution (CDH), Bash or Python scripting
- Automated configuration tools: Ansible, Puppet
- Enterprise Linux(RHEL) family of distributions
- Continuous Integration/Deployment tool: Jenkins, Visual Studio team services (VSTS by Microsoft)
- Version Control tool – GIT
- Scripting Language: Python, Perl, Shell
- Cloud Server: Microsoft Azure, Amazon- AWS, Google Cloud

Selection Process(In Campus): -

Round 1:Pre-placement Talk

Round 2:Hackerrank Technical Test (NodeJs, js. Ruby, Networking, Cloud, Java, React, OOPs) 90 mins

Round 3: Aptitude Test (Logical Reasoning and Data Interpretation and English Comprehension) Test 60 mins

Round 4: Technical Interview.

Round 5: HR Interview

Eligibility:

B.Tech CS/IT group & ECE

80% and above throughout the academic journey (10th, 12th, CGPA)

No live backlog.

GlobalLogic, a Hitachi Group Company, is a leader in digital product engineering. We help our clients design and build innovative products, platforms, and digital experiences for the modern world. By integrating our strategic design, complex engineering, and vertical industry expertise with Hitachi's Operating Technology and Information Technology capabilities, we help our clients imagine what's possible and accelerate their transition into tomorrow's digital businesses. Headquartered in Silicon Valley. In 2021, GlobalLogic was acquired by Hitachi Ltd. GlobalLogic's capabilities, combined with Hitachi's Lumada, enables us to deploy Hitachi's extensive library of digital solutions to the global market and to help customers and societies solve their issues through Agile application development in the cloud.

CTC: 5.66 LPA

Eligibility Criteria:

Above 60 percent in Class X, XII, and Graduation

No backlogs are allowed.

A gap of up to one year is allowed.

Domains:

- GenAI
- Java
- .Net
- Embed

Selection Process:

Round 1: Online Assessment (2Hr)

Aptitude Round

Query Correction (PostgreSQL)

Query Writing (PostgreSQL)

Coding Round

Writing Section

Round 2: Technical Interview (30 mins)

Round 3: Managerial Interview (40 - 60 mins)

Round 3: HR & Result (30 mins)

Evaluation Criteria -

→ Minimum of 60% throughout academic career

- ◆ Should be from CSE,ECE,IT,ETC,ISE,DSE,EEE,EE,E&I,AI/ML
- ◆ Should not have any backlogs
- ◆ Should be in the 5th or 6th semester only

→ For evaluation of students -

- ◆ Technical Assessment - Students will be assessed on Coding and Programming, Problem solving skills, Logical reasoning, Computer Fundamentals, English Proficiency and Next-gen skills
- ◆ In-Person Technical Evaluation - Students will be interviewed on their existing skills and expertise and on newly acquired skills through IAP
- ◆ In-Person Managerial Round - Overall technical and cultural fit to be assessed during this round
- ◆ Behavioral Round - Behavioral aspects of the candidates to be assessed during this round along with explaining role designation/career path/ compensation/ general policies and addressing any other query the candidate might have.

BRISTLECONE

Bristlecone is a leading provider of AI-powered application transformation services for the digital supply chain. Recognized as one of the Top 10 leaders in supply chain solutions, Bristlecone empowers customers with speed, visibility, automation, and resiliency to thrive in a dynamic environment. By combining industry focus, supply chain expertise, a consulting-driven approach, and proprietary accelerators, Bristlecone delivers unmatched business value. As part of the \$20.7 billion Mahindra Group, Bristlecone fosters a high-performing culture that values innovation and offers excellent learning and growth opportunities.

Role: Associate Engineer

CTC: 4.25 LPA

Experience & Expectation:

- Knowledge of fundamentals of analytics.
- Knowledge on latest trends and technologies in Analytics e.g. Predictive Analytics
- Knowledge / experience in any analytical tool/technology.
- Knowledge / experience in integration with Cloud applications.
- Experience in collaboration with different domains (functions) within and third-party Partners (Vendors).

Key responsibilities on this role may include but not be limited to:

- Representing organization as an ambassador
- Understanding and implementing SAP analytical applications at customer locations
- Conceptualizing and developing SAP analytical solutions
- Coordinate with business users and other IT departments to design, develop, implement, enhance, and maintain complex analytical solutions using various tools and technologies within SAP Space
- SAP Functional Experience in modules like SAP SD, MM, PP and in Finance Module.

- Supporting the delivery of Analytics projects.
- Supporting sales teams with pre-sales assistance including documentation, building custom demos, presenting to prospective customers etc.
- Supporting business development, presales and GTM activities
- Should be willing to learn new technologies around data engineering, data Science, cloud technologies, Testing strategies and concepts platform development and related areas.
- Must have good understanding of new technology domains – AIML, DL, IA,RPA, BlockChain, Cloud Computing and DevOps.
- Should have good understanding of Software Development Lifecycle and best Software Engineering practices.
- Should be flexible and adaptable.
- Willingness to adopt new emerging technologies.
- Excellent verbal and written communication, interpersonal and presentation skills
- Proficient in use of PowerPoint, MS Word, MS Excel and SharePoint Applications
- Should be ready for short-term or long-term travels across the globe

Eligibility Criteria:

B.E/ B.Tech Computers– Minimum 60% aggregate in Comp.science / Electronics

Selection Process:

Round 1: Cognitive Test (Online) - 1 hr

Includes aptitude Mathematical Ability and technical questions.

- Reasoning Ability
- Verbal Ability
- Pseudo Code

Round 2. Group Discussion - 10 min

A general topic will be provided, and candidates will have 10 minutes to discuss.

Round 3. In-Campus Interview

Includes technical questions and HR interaction.

Vconstruct

Building Better, Smarter, Faster is our mission. Since 2013, our 400+ experts have been transforming the construction industry with innovative solutions in Virtual Design and Construction (VDC), Project Controls, Accounting, and Software Development. Serving 100+ projects globally, we deliver smarter processes, better products, and faster results. Join us in reshaping the future of construction with technology.

CTC: 6.75 LPA

Stipend: 20k, join in January 2027 as Graduate Trainee and then full-time from June/July 2027 based on their performance.

Job Roles:

1. Project Engineer – Virtual Builder

Skills and Qualification:

Candidates having B.E./ B.Tech. or higher Degree in Civil or Construction related field.

- A Working knowledge of BIM Coordination, Project Management, Change Management And Constructability is preferable.
- Understanding of the overall construction process ranging from Design to commissioning.
- Working knowledge of any prominent VDC software like Revit, Navisworks, Tekla and Civil 3D is desired.

Work Location: Pune (Magarpatta City)

Eligibility: Civil, Min 60% in 10th, 12th & Graduation, No Live Backlog.

2. Software Engineer – Software Solutions for Construction

Requirements:

Good knowledge of object-oriented design and development and DBMS concepts

Expert in HTML5, CSS3, JavaScript

Excellent communication, presentation and analytical skills

Should be willing to work collaboratively across different skill sets

Working knowledge of at least one front-end framework (react/angular) and back-end stack

Eligibility: B.E. Final year students from CS/IT, Min 70% or equivalent marks (10th, 12th Or Diploma and overall in graduation).

3. Data Science Engineer - DSA

We are looking for candidates with passion for technology, excellent analytical skills, and ability to solve complex problems to undergo training in data Science related areas. Successful candidates will be part of the Data Science and Analytics team which is a tight-knit group of analysts and engineers that support all data aspects of DPR business.

Requirements:

B.E. / B.Tech Final year students with CS/IT background

Excellent Academic Credentials

Excellent Communication and Analytical skills

Responsibilities:

Post training, selected candidates will work in Data Science and Analytics. Candidates will be working mostly on US or EU based projects. They will transition into a data science engineer with the responsibilities outlined below

- Understand and analyze the business requirements
- Design and deployment of the database - Ability to understand, consume and use API's, JSON, Web Services for data pipelines
- Developing integrations between various applications
- Design, Develop and deploy reports/dashboards/data visualizations using Power BI - Optimize reports/dashboards with a focus on usability, performance, flexibility, testability, and standardization.
- Build full stack data science models with various Azure technologies
- Use R or Python to implement statistical models, machine learning, and analysis (Recommenders, Prediction, Classification, Clustering, etc.)

Selection Process:

Round 1: Online InCampus Assessment (Coding 2 ques, Aptitude Mathematical Ability)

- Reasoning Ability
- Verbal Ability
- Pseudo Code
- Puzzle Solving

Round 2: Technical Interview 1

Round 3: Technical Interview 2

Round 4: HR & Result

Role: Platform Services Associate Analyst

CTC: ₹19 LPA - ₹13 LPA

Location: Pune

What You'll Do:

- Tech Stack: Python , Analyst, SQL, PowerBI, Tableau.
- Build complex solutions for clients using tools and technologies on the ZAIDYN platform.
- Take ownership of activities and responsibilities across all project lifecycle phases to solve business problems in one or more client engagements.
- Apply development methodologies (e.g., agile, waterfall) and best practices (e.g., QA procedures, unit testing) to ensure successful and timely task completion.
- Collaborate with team members to ensure seamless project delivery.
- Exhibit flexibility in tackling new challenges and demonstrate excellent task management.
- Assist in creating project outputs, including business case development, solution design, user requirements, prototypes, technical architecture (if needed), test cases, and operations management.
- Provide transparency in driving tasks to completion and report accurate progress status.
- Bring a consulting mindset, leveraging technical and business expertise to solve problems and innovate.
- Assist senior team members and delivery leads in project management responsibilities.

What You'll Bring:

- **Qualification:** Bachelor's degree in Computer Science, IT, or related disciplines with a strong academic record.
- **Additional Skills:**
 - Bachelors Degree in CS, IT or EE
 - Office 365 Admin center and products suite knowledge 1-2 years of experience in Power BI Administration
 -

- Experience in AWS Administration, Application deployment and configuration management
- General database and data warehousing concepts and best practices
- Working knowledge of different Operating Systems like Windows
- Knowledge of AWS service (EC2,S3,IAM,VPC,Lambda,EMR,CloudFront,Elastic Load Balancer etc.)
- Good knowledge of RDBMS and database technologies like SQL server, PostgreSQL.
- Basic knowledge of web server software like IIS or Apache Tomcat
- Good Knowledge of any scripting language like PowerShell, Python, Bash/Shell scripting
- Eagerness to contribute in a team-oriented environment
- Excellent communication and organizational skills
- Comfortable working in rotational shifts
- Ability to quickly learn new platforms, languages, tools, and techniques as needed to meet
- project requirements
- Ability to work independently

Role - Software Engineer – Test

Responsibilities:

- Understand the behavior of complex web-based applications and apply that knowledge towards testing
- Contribute to a project's overall test strategy and test plan
- Create and execute test scenarios; select the best methods, techniques and evaluation criteria for testing
- Identify test data requirements and generate required data to support testing
- Evaluate and analyze application behavior and data for potential software issues
- Clearly report and help prioritize issues found during testing
- Create test deliverables required by company and project testing standards
- Work collaboratively with other testers, developers, and stakeholders
- Identify and lead process improvement efforts
- Contribute during design reviews and recommend product improvements

Qualifications:

- Bachelor's or master's degree in computer science, a physical science, engineering, mathematics, economics, or another discipline with a quantitative focus
- Strong academic record [India] (CGPA 7.0 or higher)
- Extensive knowledge of manual testing
- Advanced critical thinking skills
- Excellent communication and interpersonal skills
- Experience testing web applications is highly desirable
- Understanding of defect tracking and test management software
- Knowledge / exposure to all aspects of SDLC/STLC
- Experience with Agile / Scrum methodologies
- Exposure to automated testing is an added advantage
- Ability to work in global cross-office teams

1. Resume Shortlisting
2. Online Coding round - (2 Coding questions and Aptitude questions Pseudo Code, Puzzle Solving, English Ability)
3. In Campus Technical Round.
4. In Campus Technical and HR Interview.

Eligibility Criteria:

- **No Backlogs**
- **Academic Requirements:**
 - UG: 70% required
 - Class X and XII: 70% required

It gives me great pleasure to introduce Varroc as a GLOBAL LEADER IN AUTOMOTIVE COMPONENTS. Varroc is a global tier-1 automotive component company. We commenced operations in India with our Polymer business in 1990. We design, manufacture, and supply exterior lighting systems, plastic and polymer components, electrical-electronics components, and precision metallic components to passenger car, commercial vehicle, two-wheeler, three-wheeler and off-highway vehicle (“OHV”) OEMs directly worldwide.

Job Description

Graduate Engineer Trainee

CTC : 11.5 LPA

Skills: Aptitude, Core subjects(as per branch) Manufacturing & Production CNC machining basics Injection molding (very important for Varroc) Die casting fundamentals Sheet metal processes Production planning basics Lean Manufacturing Kaizen, 5S Design Knowledge CAD software: CATIA / SolidWorks Engineering drawing reading GD&T (Geometric Dimensioning & Tolerancing) Tolerance stack-up basics DFMEA / PFMEA basics

Selection Process(Online):-

1. 10th/12th percentage based resume shortlisting.
2. Aptitude : Reasoning Ability
 - Verbal Ability
 - Pseudo Code
 - Puzzle Solving
 - English Abilityand Core Subjects Test (As per branch) (Not Proctored).
3. Technical Interview (core ques , technical ques, CN, Managerial)
 - Round 1 - technical
 - Round 2- Managerial
 - Round 3 - HR

Eligibility:

B.Tech- CS group, IT, EC, EN, IND, EE, Mech

10th : 90%

12th : 75%

Degree: 7 CGPA

No live or dead backlog

No gap year

CTC: 3.25 / 4 - 5.5 LPA

Supercoder selection:

- Candidates who excel academically & perform well in the selection process (excluding HR round) will qualify for consideration in the Supercoder cadre selection.
- Eligible candidates will then take the Supercoder test, and those who pass will be designated as Supercoders.
- Eligibility: CS/IT group.

Selection process:

1. Aptitude Test : (90 min)
Reasoning Ability, Verbal Ability, Pseudo Code, Puzzle Solving, English Ability, English Essay/Story, Conversational Test.
2. Technical & Psychometric Test (technical MCQ, 2 coding test - 60 min)
3. Verbal Communication Test (SWAR)
4. Technical Interview
5. HR Interview

Eligibility

70% or 7 CGPA (Without Rounding-up) in 10th, 12th /Diploma (in case done)

No Active Backlog

There should not be a gap of more than one year.

Upon Selection

- Candidate will be on probation for 6 months
- Candidate clearing the regular selection process would become eligible for CTC of INR 3.25 L /Annum
- COE Students will get 4 LPA. Only those who clear COE Exit Tests.

- Candidate successfully passing the Supercoder selection process would become eligible for CTC of INR 5.5 L /Annum
- Candidates will have to sign an indemnity bond for INR 1 L for a mandatory service period of 2 years from date of joining the company.

Schneider Electric

CTC: 12.5 LPA, Stipend: 35k

Job Location: Mysore, Mumbai, Ahmednagar or Vadodara

Responsibilities

- Design & development of Low voltage Switchgear products like Air Circuit breakers, Molded Case Circuit Breakers, Contactors, Relays, and Starters etc.
- Understanding the technological trends, market demands, customer preferences and competitors' strategy
- Get conversant with latest design trends in L.V. switchgear products.
- Develop fair idea/ knowledge of engineering plastics and contact materials, their properties, characteristics used in switchgears
- Understand and apply Indian and International Standards on L.V. Switchgear and their Testing.

- Continuous Integration (CI)/ Continuous Deployment (CD) pipeline and Agile methodology.
- Any of Mobile, Analytics, Cloud and Digital technology domains.
- Ability to design and implement solutions which can run on-prem, hybrid and multi-cloud ecosystems such as GCP, AWS, Azure, Ali Cloud.
- Ability to harness open-source development thus leveraging collective wisdom and learning
- Understanding of cyber threats/ vulnerabilities and applying secure coding standards and associated protocols.
- Ability to leverage industry best integration patterns and practices to integrate multiple existing/ new building blocks for seamless end-to-end customer experience.
- Developing, maintaining, and supporting current systems for better efficacy and higher availability.

Selection Process:

Round 1: Aptitude + Technical (75 Minutes) & Coding assessment (30 Minutes)

Only the students who clear the Aptitude + Technical assessment, will be able to appear for the coding test.

Round 2: Technical Interview (Pune)

Round 3: HR Interview

Eligibility Criteria:

Min. 60% or 6.00 CGPA throughout (10th / 12th / Diploma / B.E. / B.Tech), No Live Backlog.

Nvidia

Job Role: QA Tool and Test Development Intern.

Stipend : 40k

Location : Pune, Bangalore, Hyderabad

What you will be doing:

- The intern will help us build tools/utility /frameworks in C/C#/C++ that would automate and accelerate testing work/flows in the fields of Autonomous Vehicles, Robotics, 3D Simulation Platforms, GPU drivers, Cloud Computing and AI.
- As a QA Tools and Test Development Intern at NVIDIA, you will collaborate with a team of talented engineers tackling some of the most complex challenges in cutting-edge technology. Mentored by the best minds in the industry, they will have the opportunity to make meaningful contributions to exciting and impactful projects.

What we need to see:

- Pursuing a graduate engineering course in Computer Science/ IT with strong academics.
- Good Communication skills (interpersonal and across teams).
- Excellent analytical and problem-solving skills.
- Very organized, proactive, and has good learning ability.
- Languages - C++/C#/.Net/Python
- Ability to apply Object Oriented Programming concepts and Data structures knowledge
- Knowledge of SQL/NoSQL Database management tools
- Ability to build applications using Generative AI APIs would be a plus
- Would be a plus to have hands-on experience in development of Web Application (ASP.Net, MVC, web services).

Skills to be Assessed :

C++, C# Programming, Python, Linux, OOPS, DS, AI/ML/DL/Gen AI.

Selection Process:

Round 1: Online Assessment (Technical and Logic ques on HackerRank)

Programming: Questions on C, VHDL, and Verilog programming

Computer architecture: Questions on finite state machines, flip flop timing, and low power design

Data compression: Questions on data compression and binary representations.

Circuit design: Questions on circuit design using half/full adders.

Clocks: Questions on clocks.

Round 2: Technical Interview

Round 3: HR Interview

Eligibility Criteria:

Min 80% in overall academics (10th, 12th, Graduation). CS/IT group only.

No Live Backlog.

Carrier

Job Role: Software Developer

CTC: 8 LPA - 12 LPA

What you'll be doing:

Industrial IoT – Managing Carrier Products Using AWS IoT:

This module emphasizes the use of AWS IoT services to monitor, manage, and optimize industrial products and processes.

Application of AI in the HVAC Industry:

AI for Business Process Improvement:

This module explores trends in the HVAC industry, particularly in aftermarket services, highlighting the relevance of IoT connectivity and AI applications for driving innovation in this space.

This module demonstrates how AI can be leveraged to enhance business processes and measure the quantifiable impact on overall efficiency.

Selection Process:

Round 1: Online Test - 2 hrs

(2 coding ques, MCQ Aptitude)

Round 2: Training & Assignments

Round 3: Interviews

Eligibility Criteria:

- Final-year engineering students pursuing a degree in Computer Science, Information Technology, or related fields.
- Minimum CGPA of 7.5 (or equivalent academic performance).
- No active backlogs at the time of application.

**Planful:**

Job Role: Graduate Engineer Trainee

CTC: 8.72 LPA, **Stipend:** 25k/month

Location: Hyderabad

Role:

- Analyze stories, specifications, and requirements to create Use cases and test scenarios.
- Prepare test cases and scripts to meet project deliverables.
- Report and track defects and problems that arise during software testing.
- Participate in development sprints and daily scrum.
- Develop and implement scripts for automated testing.
- Collaborate with Product Management to ensure requirements are user-centered and testable.
- Collaborate with Development to ensure designs are user-centered and testable.
- Will be working in Software Development including Java/C# with Strong Problem-Solving Skills, object oriented design, data structures, algorithm, Design, and complexity analysis.
- Understanding modern web development technologies and techniques, including AJAX, HTML5, JavaScript, jQuery, CSS, Responsive Design, web services, NoSQL databases.
- Disparate technologies, typically ranging from front-end user interfaces through to back-end systems and points in between.

Selection Rounds:

1. Online Coding Test
2. Technical Round 1
3. Technical Round 2
4. HR/Final Selection

Skills Requirements:

OOPS

Problem-Solving

Logical Reasoning

Algorithms, Sorting arrays

Databases, Data Structure

Coding, SQL Queries & JavaScript

Selenium web driver, Java, C/C#

Eligibility Criteria:

Percentage: 70% throughout academics 10th/12th/Graduation

No Active Backlog

Note: Internship to full time conversion of students will be purely based on the individual performance and opportunity available with us at that point in time.

Fendahl:

Domain: Software company in CTRM/ETRM Domain

Designation: Trainee Software Engineer

CTC: 7.5 LPA (Gross CTC- 5.25 LPA + 2.25 lacs retention bonus).

Location: Nagpur

Requirement:

- Candidates should be good in programming and aptitude
- No special programming language training needed, however candidates knowing C# / Dot Net would be preferred.
- Candidates should be ready to work from Nagpur location.

Selection Process:

Round 1: Resume shortlisting.

Round 2: Online InCampus Assessment (Aptitude + Programming).

Round 3: Written Coding Test. (InCampus)

Round 4: Technical Interview I (InCampus)

Round 5: Technical Interview II (Company Premises)

Round 6: HR Interview (Company Premises)

Eligibility:

CS/IT group, ECE, EN

Min. 60% 10th, 12th & Graduation

Pubmatic

PubMatic is hiring candidates who can design and implement next-generation highly scalable, distributed, and low-latency applications. If you get excited building applications and architecture to handle 100's billions of requests per day, managing millions of requests per second with a creative and fast-paced work environment, competitive pay, great incentives, a culture of teamwork, smart and friendly colleagues, and plenty of opportunity to grow in your career then you should consider applying for this position.

Job Role: Graduate Engineer Trainee

CTC: 11.6 LPA

Requirements:

- Excellent Problem solving and analytical skills.
- Knowledge of Operating Systems concepts
- Ability to code using any programming language, viz. C, Java, Scala.
- Good understanding of data structures and algorithms.
- Knowledge of SQL and databases.
- Good fundamental understanding of software engineering.
- Ability to communicate thoughts appropriately.
- Preferences in the skills - Java, C, Javascript, Golang.

Selection Process:

Round 1: Online Test: 90 minutes

Round 2: Technical Interviews - 2 rounds (Pune)

Round 3: HR Interview

Eligibility Criteria:

Min. 65% (Engg. and 10th,12th, Diploma) and above marks in all semesters

No backlogs and no year gaps.

Trimble:

Job Role: Graduate Technical Interns (opportunities in Construction, Transportation, Agriculture and Geospatial domains).

CTC: 7 LPA

Stipend: 21.5k (Upon successful completion of the internship, FullTime will be offered).

Job Purpose

Design and Develop Software solutions to meet the functional requirements of innovative products (pertaining to Mobile/Cloud/Desktop and various domains) developed by Trimble divisions. Make use of well-established design patterns and architectures that suit the mobile platform and follow agile development processes. Perform unit testing of the code developed, develop unit test cases and test harness. Perform system integration and bug fixing, develop user documentation, generation of relevant reports and review similar work done by peers.

Main Responsibilities:

- Read and understand high-level product description or requirement documents and propose one or more software designs at the module level that are highly reusable and subject to the design principles of the software's target host platform.
- Decompose design elements into the structured code as per prevailing coding guidelines, preparation and execution of unit test cases, and development of test codes or test harnesses. Trace back through code, design, and resolve issues and bugs.
- Document work, software designs, code and record and produce test reports and release notes
- Plan, organize, and execute assignments with very little or moderate supervision, in an agile environment
- Responsible for deliveries in the required deadlines. Deliveries can be modules, documentation, customer releases, etc.
- Coordinate with the team for the timely delivery of work products. Ensure the quality of work products by reviews.
- Sub-Module level responsibility in large projects and Module (or component) level responsibility in small/medium-sized projects and complete responsibility is small-sized projects, depending upon the complexity and decomposition.
- Work with User Experience, and QA teams to ensure the validity of the solution.
- Be contemporary by adopting technological and market evolutions.
- Other responsibilities as assigned by the management from time to time.

Skill sets:

- Good understanding of operating systems principles, embedded systems, software architectures, software algorithms, data structures, and software engineering principles.
- Stronghold in OOAD and object-oriented programming language.
- Experience in applications programming is preferred.
- Good exposure to design, development, and debugging tools.
- Knowledge of various Software Development Lifecycles.
- Good analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Upbeat, highly motivated, and self-starter.

Qualifications & Experience:

- Bachelors of Engineering.
- A good score in any of the national level Olympiads or talent search examinations will be a value addition. A good JEE score will be a big bonus.
- Paper presentation in a national level forum, contribution to open source projects, and contribution to standards bodies will be value addition.

Eligibility:

CS/IT group only.

80% and above throughout (10th,12th ,UG -until 6th Semester)

No Live Backlog.

Yoptima

Job Role: Account Executive

CTC: 7 LPA, **Stipend:** 25k/month

Location: Jui Nagar, Navi Mumbai

Post-Internship Opportunity: After successfully completing the internship and a thorough assessment, candidates will be offered a permanent role with a total compensation of ₹7 Lakh CTC (₹5 Lakh Fixed + ₹2 Lakh Variable+ other benefits) for BTech graduates.

Responsibilities:

- Analyze digital behavior of the online consumers across different digital channels and design actionable insights and solutions to improve marketing ROI at scale.
- Work with large, complex data sets. Solve difficult, non-routine analysis problems, applying advanced analytical methods as needed.
- Assist in designing relevant marketing plans and strategies for digital ad campaigns, combining understanding of consumer behavior, data driven insights, product positioning and marketing objectives.
- Troubleshoot technical issues both internally and with Third party vendors.
- Manage servicing needs of clients and win sustainable customer delight and brand advocacy.

Competencies:

- 0-2 yrs Exp with Bachelor's or Master's degree in a quantitative discipline (e.g. business administration, engineering, statistics, operations research, economics, mathematics).
- Strong analytical and problem-solving skills.
- Ability to present results of complex analysis compellingly to both technical and non-technical audiences.
- Self-motivated with the ability to work independently and within a team.

Selection Process:

Round1: 8D Online Assessment – A mandatory evaluation.

Round 2: Shortlisted candidates from the assessment will go through 2-3 rounds of interviews with the Co-founders (COO & CEO).

**Bluealtair**

Job Role: Graduate Engineer Trainee

CTC: 5 LPA, **Stipend:** 20k/month (Permanent placement - Post internship completion based on the performance).

Location: Pune

About us: Blue Altair is a successor company of Fresh Gravity.

It is a niche, sleek, high-end consulting firm that is employee centric, client focused, partner tied, and innovation driven.

Core capabilities at Blue Altair are:

- API Management & Integration-
 - o API Business Strategy with “API First” Approach,
 - o API Program and Technical Strategy,
 - o iPaaS Strategy, API Gateway Package Selection,
 - o Deployment (on-premises, cloud, hybrid),
 - o iPaaS based system integration)
- Data Management
 - o Cloud Data Migration,
 - o Smart Analytics
 - o Master Data Management,
 - o Data Platform Strategy and Roadmap
 - o Data Platform Modernization
 - o Data Governance and Strategy Roadmap

- Data Science and AI
 - o Big Data Analytics,
 - o Machine Learning & Artificial Intelligence,
 - o Deep Learning, Supervised,
 - o Unsupervised and Semi-Supervised Learning,
 - o Explainable AI,
 - o Computer Vision,
 - o Natural Language Processing
- Digital Application Development
 - o Full Stack Development
 - o Web and Mobile Development
 - o DevOps
 - o Microservices

Selection Process:

Round 1: Online Programming Test (MCQS on Aptitude ques, OS, CN ,DBMS , 2 ques Coding Ques)

Round 2: Technical Interview 1

Round 3: Technical Interview 2

Round 4: HR Interview

Eligibility Criteria:

Min. 60% & above in 10th, 12th, Graduation

No gaps or year down in academics.

No Live Backlog

JSW

Job Role: Graduate Engineer Trainee

CTC: 6 LPA (Fixed + Variable)

The CTC is INR 5.5 LPA - INR 4.67 LPA (Fixed) in addition to INR 83,000 (Variables)

Retention Bonus - INR 1 lakh (End of Year 1 - 50% and End of Year 2 - 50%)

Job Description:

- Completing all tasks set by the Supervisor and assisting wherever possible.
- Observing existing strategies and techniques and offering suggestions for improvement.
- Conducting research and collating data.
- Traveling to different sites and gaining practical experience in new work zones.
- Working closely with staff to foster professional values and build good relationships.
- Observing health and safety guidelines at all times.
- Attending meetings and workshops.
- Submitting to all forms of evaluation during the traineeship.
- Compiling reports and delivering presentations to staff members and other stakeholders.

Selection Process:

Round1: Online Assessment

Round 2: Online Assessment

Round 3: Interviews

Eligibility Criteria:

- Candidates should be open for any location pan India. no location preference will be considered. In case he/she accepts the offer and then drops out because of the location constraint, then he/she will be blacklisted from the JSW group.
- Branch: Mech , Indus , Civil
- Candidate's age must be 24 years or less as of 1st April 2025.
- Candidates must meet all the necessary fitness criteria. At any stage, the candidate must meet all necessary fitness criteria.
- No Live/Open Backlogs are allowed, In the case of Previous backlogs all should be cleared/closed before applying. No lateral entry is allowed. No repeat year allowed.
- The offer will be revoked if any information provided by the candidate at any stage stands incorrect.
- No gap year is allowed between 10th, 12th, or any year of the Graduation Degree.
- Min 60% and above throughout 10th, 12th and College.

GoCOMET:

Why GoComet?

GoComet is a dynamic SaaS start-up that provides AI-powered transportation visibility solutions to revolutionize the trillion-dollar logistics sector. At GoComet, we are revolutionizing the logistics sector one day at a time, and every team member is committed to making it a reality. We're seeking individuals who embody our core values, character, and attitude. While we recognize that skills can be developed with the right mindset and learnability, we prioritize those who share our philosophy. Our recruitment processes reflect this belief. Look no further if you're looking for a diverse, talented, and vibrant workplace that recognizes and rewards hard work. We're ambitious, fast-paced, and unafraid to experiment, fail, learn, and ultimately succeed. This is us! Join our team if you share our culture and values. We're an equal-opportunity employer. We welcome qualified applicants from all races, colors, religions, sexes, nationalities, sexual orientations, gender identities, and abilities.

Job Role : Backend Intern (Data Engine)

Stipend: 15K

Roles & Responsibilities:

- Understanding of manual and automation testing.
- Have Basic programming skills.
- Concentrating on details, including automated tests and documentation.
- Ambitious and passionate about QA.
- A great teammate and self-starter that is comfortable working in a rapidly changing environment and taking initiative with limited resources.
- Comfortable managing multiple assignments with competing priorities and tight deadlines
- Fast learner with good communication skills.

Experience & Skills:

- Experience in Development using Ruby/Python.
- Design and implement solutions to extract data from diverse websites, adhering to project requirements.
- Implement robust data extraction and parsing mechanisms to ensure accurate and structured data retrieval.
- Should have live projects available to demonstrate
- Good understanding of Object Oriented Programming
- An agile mindset and the ability to adapt to changing priorities and requirements
- Good in analyzing and solving problems

Btech Grad

AVEVA

Role: Graduate Trainee

Reports To: Team Lead

Contract: Full-time permanent

Department: Global Delivery Centre, India

Location: Hyderabad/Bengaluru

About AVEVA

AVEVA is a global leader in industrial software, driving digital transformation and sustainability. By connecting the power of information and artificial intelligence with human insight, AVEVA

enables teams to use their data to unlock new value. We call this Performance Intelligence. AVEVA's comprehensive portfolio enables more than 20,000 industrial enterprises to engineer smarter, operate better and drive sustainable efficiency. AVEVA supports customers through a trusted ecosystem that includes 5,500 partners and 5,700 certified developers around the world. The company is headquartered in Cambridge, UK, with over 6,500 employees and 90 offices in over 40 countries.

We take pride in our core values and the diversity of our people, valuing the unique experience and expertise that people from different backgrounds bring to our business.

AVEVA is an Equal Opportunity Employer, and we take pride in the diversity of our employees, valuing the special experience and expertise that people from different backgrounds bring to our business. The ability to develop ground-breaking technologies is one of our key assets and our people make it happen.

About the role

As a part of the development team, you'll be responsible for configuring, developing, testing and maintain AVEVA software products and solutions. Responsible for delivering world-class products and solutions using latest technologies, established standards and processes in collaboration with other teams.

In this role you will:

- Be an integral part of global services team.
- Configures and/or customises core product.

• For Developer Role

- Develop applications using cutting edge technologies likes .Net Core, Microservices, Node, Python, React, Angular, SQL, Analytics and Machine learning which meet functional and non-functional requirements with built-in-quality.

• For Non-Developer Role

- Develop applications/models using AVEVA products, which meet functional and non-functional requirements with built-in-quality.
- Author, review, execute, maintain, and test applications.
- Develop, build, customize, deploy, and manage the environment, test suits and test automation frameworks.

- Performs both unit and integration testing.
- Deploys solutions into AVEVA's or Customer infrastructure.
- Contributes to technical project documentation deliverables, taking responsibility of accuracy and flow of content.
- Manages own time effectively within the scope of work allocated and ensures both a timely and high-quality delivery.
- Performs knowledge transfer to team members and customer representatives.

It is a pre-requisite to be able to function effectively as a member of a dynamic team within a matrixed organisation. Excellent communication skills will be required to develop good working relationships in the following areas:

- the region-based Project Managers and technical resources to ensure successful delivery of the project.
- with other members of the Global Delivery Centre team in Hyderabad within a project and to share knowledge
- develops good working relationships with customer representatives and always provides the highest level of customer service and professionalism.

Mandatory Competencies, Knowledge and Skills:

- Must have regular BE/BTech degree pursuing in (Computer, Chemical, Mechanical, Electrical, Instrumentation, Industrial)
- Average aggregate 65% and above with no backlogs
- Strong analytical skills, Communication, Problem Solving skills.
- Basic knowledge of software development methodologies (e.g., Agile, Waterfall) and on software development lifecycle (SDLC).
- Good Problem Solving and Requirement understanding skills as well as a positive attitude, ability, and desire to learn new processes and technologies.
- Organization: You'll be working in a fast-paced, high-volume, and evolving work environment, so time management and effective prioritisation will be essential
- Customer focus: You'll be working directly with our customers. Being able to listen to them and understand their requests, and then address them in a proactive and consultative manner, will be part of your day-to-day
- Problem-solving: You'll need to enjoy getting stuck into problems. Troubleshooting and solving challenging problems is a big part of this role.

Come and join AVEVA to create the transformative technology that enables our customers to engineer a better world!

Job Title : Managed Network Expert (Subject Expert)

Work location: Remote, work from home

Timings: Flexible work schedule (as per individual preference)

Job Type: Part-time

Our subject experts are expected to solve academic questions asked by students on our Question & Answer board.

Eligibility

- Enrolled as a student in Diploma, Bachelor's, Master's or Doctorate degree programs in the respective field of study.

- This opportunity is NOT restricted to final year (semester) students only. Students from previous years can also apply.

Expectations

- Ensure that outlined quality parameters are followed.
- Ensure that authoring guidelines are adhered
- To ensure high-level of academic

Benefits

- Compensation: Paid per question answered (no limits)
- Average Income: INR 30,000 to INR 80,000 per month*
- Experience certificate at the end of tenure.
- Earn while you learn.
- Academic development.
- Flexible work schedule.
- Exposure to working at an MNC.

Company Description:

As the leading student-first connected learning platform, Chegg's Student Hub makes higher education more affordable and more accessible, all while improving student outcomes. Chegg is a publicly-held company based in Santa Clara, CA with offices in San Francisco, New York, Portland, India, Israel, Berlin, and Ukraine. Chegg Student Hub Services Include: Chegg Study, Chegg Tutoring, Chegg Writing Tools, Test Prep, Careers Search, Internship Admissions and College Admissions.

Chegg India, a premier educational services company and a wholly owned subsidiary of Chegg Inc., has been offering high quality services in the area of Homework Help, Scholarships and Content Creation for American University Textbooks. Chegg India has a vast network of employees with offices in Delhi and Visakhapatnam ably supported by a team of Managed Network Experts and Territory Managers who handle the Pan India Operations.

'Student First' is our DNA. It drives everything we do. From the way we build our network to the way we connect students to opportunity. We give every student the ability to realize their full potential.

About the company:

JTP is a listed company on JASDAQ (Japanese Stock exchange) as JTP 2488. Our portfolio encapsulates services and products in ROBOTICS, Hardware / Software development, Pharma and Human resource development. Our head office is in Japan with branch offices in the USA, India, Korea, and many other countries. JTP has over 35 years of experience in the Japanese market. We work with clients such as EMC, SAP, Hitachi, NVIDIA, Softbank, Mitsubishi etc.

Job role: System engineer

CTC: 24 LPA

Location: Japan

The hiring process will be as follows:

Step 1: Application.

Step 2: Selection for technical assessments.

Step 3: Technical assessment

Step 4: English Interview (**Please note students with insufficient international level English skills will be eliminated. Students with Mother Tongue influence will be eliminated**)

Step 5: Virtual Training + Project round.

Step 6: Golden ticket opportunity for few students*

Step 7: CEO panel Interview.

Eligibility branches: CS, IT, EC, E&TC, MCA, BCA.

Eligibility criterion: All students who are passionate for IT. (No merit criterion)

About Darwinbox:

Darwinbox is Asia's fastest-growing SaaS-based HR Technology platform. A brainchild of alumni from the country's most distinguished institutions (IIT/IIM/XLRI) and organizations (McKinsey, EY, Google), Darwinbox is the preferred technology partner of 500+ global enterprises with more than 1 million+ employees using the platform. Our end-to-end HCM technology suite competes with the best in the business and has won against giants such as SAP, Oracle, and Workday several times to acquire iconic enterprise customers ranging from the largest conglomerates to unicorns - Adani, Mahindra, Kotak, TVS, Arvind, Nivea, Puma, Swiggy, Paytm, Bigbasket and Delhivery etc.

The rate at which our product and market presence is growing is unprecedented. We're a rocketship. We're not planning on slowing down anytime soon. And, that's why we need you!

Designation: Intern- Product Development (The role can be converted to full time Software Engineer)

Duration & Stipend: 6 Months, 25k per month

CTC: 16,30,000 LPA

Location: Hyderabad

Roles and Responsibilities:

- Coding
- Product Development
- Backend or Front-end Development

As fitment with the organization culture is very important you will immensely like the job if you:

- Enjoy working in a fast-paced company environment.
- Should be stack agnostic and should not have any tech prejudice.
- Prefer a non-hierarchical, independent, and non-pushy environment.
- Are self-motivated to take up a high degree of ownership.
- Passionate about programming and can't sleep without coding.

Min. Eligibility: B.Tech (CSE/IT) 2025, Minimum 75%(No Backlogs)

Selection Process:

- Coding Rounds- 1 & 2
- Technical Interviews
- HR & Management Interview

Job Title: Cyber-Security Trainee

CTC: 10.48 LPA

Location: Pune

Position Summary:

Describing below the primary purpose and function of this job:

- TIAA India is looking for trainees under Cyber Internship Program with an objective of providing exposure to young and budding tech talent and providing an opportunity for them to get acquainted with the Corporate culture and insights into Technology.
- Selected Candidates will have the opportunity for 10 Weeks of internship with Cyber Security team before onboarding them as full-time employees as Trainees.
- The Trainee will be responsible for development, communication, implementation, enforcement and monitoring of security controls to protect the organization's technology assets from intentional or inadvertent modification, disclosure or destruction. The trainee

is responsible for monitoring computer security procedures and maintaining IT security policies, procedures and testing results.

- The Trainee typically works as part of a project team or as an individual contributor under guidance from a Mentor. The Trainee will communicate progress, resolve technical issues and work with the appropriate teams for solutions.

Fundamental knowledge and conceptual understanding required for-

- Working knowledge of Computers and IT Concepts like OS, Network, Databases, IT Systems and web applications
- Cyber Security Concepts and Principles covering various cyber domains such as Information Security, Data protection, IT Risk and Governance, Security Operations, System Design and Architecture, Web Application Development, SDLC concepts, DevOps, Application security and vulnerability testing, Encryption and Cryptography, CWPP, CSPM, Identity & Access Management, Privilege access management, Security Monitoring and reporting.
- Web development tools and scripting knowledge for Python, Bash, Shell, R, PowerShell, JSON, and others
- Conceptual knowledge on emerging technologies – Blockchain, Quantum Computing, AI / ML, Serverless, API

Key Duties & Responsibilities:

The Trainee will attend a boot camp (an initial training program) as per the requirement where they will undergo a training program focusing on TIAA Values & Behavior, Business domains, technology platforms, etc. After successful completion of boot camp the Trainee will be aligned to any of the below mentioned cyber domains based on their aspirations, project requirements and interview performance.

- Threat Monitoring
- Vulnerability Management
- Defense-in-Depth practices to protect networks.
- Threat Intelligence
- Platform Security Engineering - Network Security, End Point Security and Cloud Security
- IAM Operations
- Cyber Custom Development
- Cyber Fraud Investigator
- EKM Engineering
- Third Party information Security Risk management

Eligibility Criteria:

- Minimum 60% aggregate in 10th, 12th and Graduation

- B.E/B.Tech in Cyber Security only

Quantiphi

Location: Mumbai/Bangalore

Eligibility Criteria:

- Branches - B.E, M.E, MCA, B.Tech & M.Tech
- 70% and above in 10th, 12th and Graduation (till now) with no-reappears/backlogs.

CTC:

1. Stipend 10K for 4 months and virtual internship
2. Stipend 23K for 2 months and in person/hybrid internship
3. CTC on FTE Conversion: 8.5 LPA (6.5 LPA - Fixed & 2 Lakhs - QCDP)

Job Role: Data Engineer

Responsibilities:

- Work with business users and other stakeholders to understand business processes.
- Ability to understand, design and implement Dimensions and Fact tables
- Identify and implement data transformation/cleansing requirements
- Profile source data to check data quality and develop Data Pipelines to implement ETL logic
- Create and execute test plans debug existing Data Pipelines
- Create data visualizations
- Write SQL code-Queries/Stored Procedures/Functions

Requirements:

- Strong SQL writing skills
- Strong knowledge on Data Warehouse and ETL concepts
- Familiarity with Kimball and Inmon Data Warehouse methodology Understand project-specific requirements, standards, guidelines, and processes
- Demonstrated success working in a team-based environment
- Good written/oral communication skills
- Strong analytical and problem solving skills

Job Role: Business Analyst**Responsibilities:**

- Participate in on-site and offshore engagements to deliver services to our client base.
- Translate the business requirements into technical problems for the team and deliver technical solutions in business terms to the client.
- Work in conjunction with the decision science and data analytics team to deliver solutions to clients.
- Create a solution plan for the short-term and long-range projects and ensure the timely execution of the same.
- Analyze the raw data to understand the existing patterns in data.
- Deliver actionable insights to clients by analyzing the results and business understanding.

Requirements:

- The position will be involved in delivering end to end solutions with quality assurance to the client by working in conjunction with technical team.
- Strong oral and written communication skills
- Strong problem solving skills
- Good at critical thinking and should have a structured approach
- Promptness to deal with different situations
- Good interpretation skills and identifying the hidden relations
- Must be a team player

- Must be willing to travel domestically and internationally

Job Role: Software Developer**Job Description:**

We are looking for a Web Developer who is motivated to combine the art of design with programming. As a Web Developer, you are expected to be highly proficient in programming methodologies along with a sense of design that will be used to build effective user experience for any application you will build. Having the knowledge of front-end, back-end, databases and cloud computing will enable you to grow in this role.

Responsibilities:

- Build reusable code and libraries for future use
- Optimize application for maximum speed, scalability and security
- Design scalable and effective database schemas for best performance
- Develop/design user interfaces for client and server side portals
- Build REST/GraphQL APIs for the server side and SPAs/PWAs for the client side applications
- Collaborate with other team members and stakeholders

Skills and Qualifications:

- Proficient understanding of web markup, including HTML5, CSS3
- Proficiency in, at least, one programming language such as Java, C, C++, C# or Python
- Understanding of core programming concepts and OOP concepts
- In-depth knowledge of Data Structures and its applications
- Understanding relational and non-relational databases and their uses
- Positive outlook towards problem solving
- Love to work on cutting edge technology
- Ability to work in a dynamic environment using agile methodologies
- Strong analytical and problem solving skills.

Good to have:

- Proficient understanding of code versioning tools Git
- Knowledge on any modern Javascript Framework will be an added advantage
- Knowledge on NodeJS will be an added advantage
- Knowledge of working on Cloud technologies like Google cloud platform/ AWS
- Familiarity with tools such as Photoshop is a plus

Job Role: Platform Engineer

Responsibilities:

- Scale distributed applications, make architectural trade-offs applying synchronous and asynchronous design patterns, write code, and deliver with speediness and quality.

- Design and develop scripts to build and deploy services using automated tools with focus on developing hooks for operations and monitoring support.
- Provide guidance to the team to implement services and systems that are highly available, scalable, and self-recoverable on cloud platforms
- Design and deploy metrics, monitoring, and logging systems to understand the system performance and isolate bottlenecks.
- Introduce new cloud technologies, tools & processes to keep innovating in commerce area to drive greater business value

Requirements:

- Strong fundamentals in object-oriented design, data structures, algorithms, complexity analysis, distributed computing and operating systems etc.
- Proficiency in, at least, one modern programming language such as Java, C, C++, C#, or Perl
- Experience in Scripting language like Bash/shell scripting
- Understand project-specific requirements, standards, guidelines, and processes
- Demonstrated success working in a team-based environment
- Good written/oral communication skills
- Strong analytical and problem solving skills

Demand Farm

Position: Associate Product Engineer (internship cum full time employment)

Experience: Fresher

Approx. Package: Up to Rs. 8,00,000/- Per Annum (after internship period of 6 months and confirmation)

Job Location: Remote (Work_From_Home)

IMP NOTE:

- ❖ Initial 6 months would be internship and during internship interns will get stipend

❖ After successful completion of internship and based on performance during internship candidates will be offered full time employment

Role & Responsibilities:

- ❖ Build high-performing, scalable, enterprise-grade applications.
- ❖ Will be part of a talented software team that works on mission-critical applications.
- ❖ Contribute to all phases of the development lifecycle.
- ❖ Design and maintain the most efficient data pipeline architecture possible.
- ❖ Assemble huge, complex data sets that satisfy both functional and non-functional business needs.
- ❖ Working closely with analysts, designers and staff
- ❖ Producing detailed specifications and writing the program codes

Skills Required:

- ❖ The candidate has excellent problem-solving and multitasking skills.
- ❖ The candidate can work as an individual contributor.
- ❖ Object-Oriented Analysis and design using common design patterns.
- ❖ Highly proficient with Core Java, and Java Spring.
- ❖ Understanding of server-side rendering and its benefits and use cases.

Educational Criteria:

- ❖ BE / BTech (IT/CS branch only)
- ❖ 2024 Pass out only
- ❖ 60% and Above throughout all academics (10th/12th/Diploma/Degree)

Round of Interviews:

- ❖ Online Aptitude cum Technical Test (2 rounds)
- ❖ Pre HR Round
- ❖ Technical Interview (2 rounds)
- ❖ Final HR Interview

TERMS & CONDITIONS:

- ❖ The intern will work from home but in full time mode
- ❖ The intern needs to work 9 Hrs (includes 1 hr of break) per day, 5 days a week for the internship
- ❖ Stipend provided during the internship will be Rs 20,000 per month
- ❖ Full time employment confirmation is completely based on performance

- ❖ The pay after confirmation will be Rs. 8,00,000 Fixed CTC
- ❖ There will be regular performance assessments done during the internship period. If the performance during internship is not satisfactory, there can be a termination even before completing the 6 months internship
- ❖ Unpaid leaves will be granted to the interns for exams during the internship
- ❖ The interns are supposed to take necessary permissions from college for joining the internship before the date of joining. DemandFarm is not responsible for any additional project submissions / documentation for grades
- ❖ Certificate of completion will be provided at the end of the internship

Taurani Holdings LTD (UAE)

Industry Sector: Manufacturing & trading of steel and allied steel products.

Job designation on joining: Engineering Trainee

Job designation on completion of 1 year: Assistant Manager

Eligibility Criteria

1. Academic Criteria – 60% Aggregate.
2. Medical Criteria – Physically and mentally fit & free from contagious diseases such as Tuberculosis
3. Work permit criteria – company sponsored visa.
4. Any other criteria – adaptable, flexible, and willing to work with a machine and spend long hours on the shop floor.

Stream : B.E, B.Tech, M.E, M.Tech, MBA Sales & Marketing

Major : Electrical, Mechanical, Metallurgy, Mechatronics, Production Engineering, Industrial Engineering, MBA in Sales & Marketing
(Streams as offered by your institute will be considered)

Place of posting: United Arab Emirates and Kingdom of Saudi Arabia.

Selection procedure:

1. Online presentation to students
2. Campus presentation of 1 hour
3. Technical assessment
4. HR interview and Business interview

Compensation:

Freshers Selected candidates who are freshers receive a competitive salary of AED 3,000 per month Gross for the period of 1 year. On confirmation after completion of 1 year the compensation will be revised based on the performance.

Bachelor/spinster shared accommodation along with transport to office will be provided.

Role Purpose:

- Gain hands-on experience in your discipline and make an impact from day one.
- Develop expertise in your field of study, within a fast-paced and complex project environment.
- Work with world-class industry experts.
- Gain varied understanding of your core discipline through hands-on experience.
- Gain increased awareness of strengths and areas of development to support professional and personal growth.

Stipend: INR 25,000/ per month

Location: PAN India.

Job title: GET – Electrical

Department: Maintenance

Job Role:

- Ensuring support to Operation of Ayurvedic Division.
- Ensuring support to Machine Performance (Productivity & OEE Improvement Trend)

Job Description:

1.1: Key Responsibilities

- Troubleshooting & Preventive Maintenance of all Electrical systems.

- Knowledge of Electrical safety issues.
- Training to Electricians & operator with plan of Department, target: Completion of 15 hrs. training
- Co-ordination with OEM & Service provider.
- Efficiency monitoring & running the plant efficiently.
- Cost Saving Projects, minimum 1000K INR
- Wastage reduction from current 8% to 4%
- MTD OEE Improvement from 62% to target 75% (Aspirational-80%)
- MTTR & MTBF reduction trend for Shreeji Line 3 and WIMCO Machines in HFR Section
- Reduction of Spare Part Cost by developing locally.
- Reduction in Quality Incident by 25% Consumer Complaints
- No. of Kaizens to be done: 100

1.2 : MIS and Reports

- Monthly Breakdown Tracking and Maintaining History Card
- Monthly ERM Compliance: PM Compliance and Breakdown Analysis

1.3 Health & safety

- Responsible for safety of self and in the area of command.
- Knowledge of Electrical safety issues

Job title: GET - Mechanical

Department: Engineering & Maintenance

Job Role:

- Responsible for Air Compressors, Process Chillers and Process Cooling Towers.
- Maintenance of Lifts, Stackers, Taski Cleaning Machines.
- Maintenance of the AHUs, doors, ACs, etc.
- Daily power report and consumables report.
- Casual manpower deployment.

Job Description:

- Utility Division
- Maintaining and looking after the total Operation, Function, Optimization and Maintenance of the Air Compressors, Process Chillers, Process Cooling Towers, HVAC Chillers, Water Treatment Plant (WTP), Effluent Treatment Plant (ETP), Boilers and Diesel Generators.
- Maintenance, Operation and Function of the AHUs, Lifts, Stackers and Taski Floor Cleaner Machines, Doors, ACs, Pipelines, Fountains, etc.
- Preventive maintenance of the mechanical equipment of the Utility Division.

- Detailed analysis of the Power and Fuel Consumption of the plant with respect to Tonnage produced and Detailed tracking and analysis of the Utility Consumables in the Plant.
- Workshop and Briquette Store Operation and Maintenance.
- Shift Schedule management of the Air Compressor operators, HVAC Chiller operators and the Lift operators.
- Optimizing and cost saving for the Utility consumables.
- Maintenance of the LLP Tank Farm area and HSD Tank Farm area.
- Casual Manpower Management and Optimization.

MIS and Reports:

- Daily MIS Power Fuel report.
- Utility Daily Consumables report.
- Mechanical work done and PM compliance report.
- Daily Manpower Requisition and Deployment tracking.
- Ensure Statutory Compliance.

Health & safety:

- Responsible for safety of self and in the area of command.
- Follow and adhere to company safety rules and regulations.
- Maintaining safety environment for workers and all.

Muthoot Finance

The Muthoot Group of Finance

Role and Responsibility: Front line sales executive for Muthoot branches operations.

Job Location: Muthoot branches (North, East & West) operations.

Eligibility Criteria: Minimum Graduates / Graduation (last year) - Non Technical

CTC:

1. **Interns for 6 months.** After the successful completion of internship, there will be performance evaluation and interns will get the PPO (Pre-Placement offer) accordingly.
2. **Stipend INR 10000/- per month** during internship period {will be registered under government scheme NAPS (National Apprenticeship Promotion) and NATS (National Apprenticeship Training)}
3. The internship period is for 6 months and after the successful completion of internship there will be performance evaluation for the placement in the Muthoot Payroll.

Role and Responsibilities:

- Proper Documentation of New KYC
- In-house canvas of products (cross selling and up selling of other financial products)
- Interest collection calling
- Win back and NLEC (Now loan to existing customers)
- C2C (click to call) data follow-ups
- Involving in marketing activities at branch level under supervision of branch head
- Collecting customer references
- Takeover data - Surgical strike data follow ups in C2C/ Visiting the catchment area along with branch head
- NPA follow-ups

DeltaX

Role: Associate Product Engineer (Full Stack Developer)

CTC: INR 7 Lakhs Per Annum

Location: Bengaluru, Hyderabad and Pune

Eligibility Criteria:

- Btech (CS and IT)
- Minimum overall 50% CGPA

Engineering Culture & Practices

- You will work in an agile SCRUM team.
- Our teams follow BDD, REST, Continuous Integration and Continuous Delivery.
- We operate hundreds of multi-tenant databases using MS SQL Server
- C#, Vue.js and SQL are the common languages that our teams use.

- Centralized monitoring across our entire stack using ELK Stack (Elasticsearch, Logstash, Kibana)

Responsibilities

- Write code :)
- Ownership for the entire lifecycle of your code: development, test, production, and subsequent fixes and improvements.
- Implement code that is clear, concise, tested, and easily understood by others.

Selection Process:

Round 1

Online Technical MCQ Test:

Will cover fundamentals for Programming, Data Structures, Networking and Micro-processors.

Expected No. of Questions: 50 Multiple Choice Questions.

Assessment Duration: 45 Minutes.

Difficulty level: Questions levels vary from easy to moderate.

Round 2

Online Coding Assessment (any programming language)

Helpful alert: Only serious coders will qualify

Round 3

Technical Interview

What we look for?

- Logical clarity
- Algorithm & Programming Concepts

Innovapptive Inc

Role: Product Owner (Trainee) and Trainee – Implementation Consultant (Campus)

Location: Hyderabad, India

Travel Percentage: 0% - 10%

Employment Type: Full-Time; Salaried

Reports To: Senior/Principal Product Manager, Product Management

Compensation: Competitive as per Indian Market standards

We are looking for a Product Owner to drive one of Innovapptive's connected worker SaaS platform products. The connected worker platform brings the maintenance front-line workers, back-office and connected assets (IIoT) together on one unified platform to perform jobs better, faster, cheaper and safer. This person will be responsible for product roadmap planning and execution, from ideation to adoption for the connected worker Platform Products. We are aggressively expanding our market penetration into several industry verticals with a special focus on Oil & Gas, Utilities,

Chemicals, Metals & Mining and Industrial Manufacturing. And we need a dynamic, fast-paced Product professional who can ideate, design, drive, build and deliver Product features at pace.

How You Will Make an Impact:

- Product Execution: Execute a high-impact product roadmap for one of the Connected Worker Platform Products on Cloud
- Rapid Iteration and Execution: Champion a culture of speed and agility, driving rapid product iteration and execution. Set high bars for quality, efficiency, and speed-to-market. Break down complex problems into actionable steps, and relentlessly prioritize to deliver results quickly.
- Cross-Functional Collaboration: Work closely with engineering to deliver high-quality products on time and within budget.
- Data-Driven Decision Making: Utilize data analytics and metrics to make informed decisions. Monitor key product metrics and perform user behavior analysis to gain insights. Leverage data to iterate on features, optimize user experiences, and drive product success.
- Startup Mindset: Thrive in a dynamic, fast-paced startup environment. Embrace ambiguity and take ownership of challenges. Display entrepreneurial spirit, innovative thinking, and a willingness to take calculated risks. Be adaptable, resilient, and results-oriented.

What You Bring to The Team:

As a Product Owner, you will be responsible for leading the development and execution of our Connected Worker Platform SaaS product roadmap. You will collaborate closely with cross-functional teams, including engineering, design, marketing, and sales, to define and deliver exceptional software solutions that meet the needs of our target customers. You will be a strategic thinker with a strong understanding of the B2B software market and possess the ability to translate customer insights into actionable product strategies. You will be a go-getter finding creative low-cost, high-value solutions and not stuck in analysis-paralysis.

Basic Qualifications:

- Bachelor's degree in a relevant field (Computer Science, Business, or a related discipline).
- Strong analytical mindset with a data-driven approach to decision making.
- Excellent communication, presentation, and influencing skills, with the ability to effectively convey complex ideas to technical and non-technical stakeholders.
- Passion for startups, technology, and staying at the forefront of tech trends.
- Ability to influence/persuade people to drive outcomes

- Analytical experience including converting raw data into actionable insights and recommendations
- Excellent communication skills – written and verbal
- Exposure to AWS cloud services.
- Business acumen – able to discern and distill product requirements into platform services requirements and epics.
- Experience with business cost-benefit analysis and requirements gathering.
- Technical acumen – able to assist with breaking down technical problems and finding root causes.

What We Offer above work:

- A positive, open, and highly-innovative environment and team
- Entrepreneurial spirit with unlimited opportunity to grow
- Opportunity to work with leading global brands on exciting and impactful projects
- Competitive Base Pay
- Best of plan on Vacation & Paid Time Off.
- Provision of Medical Insurance for family - self, dependent, spouse, dependent children, parents/parent-in-laws
- Paid Maternity and Paternity leave
- Bi-annual reviews to ensure transparency and promoting high performance culture
- OKR Driven Performance Development Environment
- Learning & Development - access to wide range of e-Learning courses

Raja Software Labs

About RSL:

Raja Software Labs (RSL) is a software development consultancy, based in Pune. Our expertise is in helping companies ship high business impact, mission critical solutions. We develop software but are in the peace of mind business. We started in 2007 and have since shipped products for the world's most innovative companies, including Linked, Google, Nest, Vida Health. Our apps have had more than 200 million downloads.

Role: Software Developer

Package:

- Rs. 7 Lakhs (Rupees Seven Lakhs per annum)

Interview Process:

- Programming test (Evaluate programming skills of the students)
- Technical Interviews: 2-3 technical interviews evaluating the programming skills of the students.(DSA and OOPs)

Eligibility Criteria:

- BE or equivalent
- Knowledge of any programming language (C, C++, Java, Python, JavaScript, Ruby, C#, Swift, Objective-C, or any other)
- Graduation percentage: 60% and higher
- Branches allowed: Computer Science, IT, Electrical, EnTC, Mech Engineering (Graduate / Postgraduate).

Role: Management Trainee

Internship Duration: 6 Months

Stipend: Rs. 20,000 per month

CTC: 6LPA (After successful completion of internship)

Location: Chennai, Bangalore, Gurugram

Eligibility Criteria-

Eligible Stream	EEE, CSE, ECE and Mechanical
Eligible Aggregate	10th, 12th / Diploma & B.E – 70%

Job Description

Looking for self-driven, motivated and skilled engineers looking to get exposure to all sides of IC building process more specifically DFT (Design for Testability) from high level architectural definition, through RTL coding, verification, Scan/MBIST/BSCAN insertion, pattern generation and validation, device bring-up for complex custom silicon and IP engagements.

- As a DFT intern, candidate will have the opportunity to work in a fast-paced environment on multiple projects in different design stages:
- Develop RTL code for DFT components generation.
- Integrate custom made DFT logic for complex SoCs (System-On-Chip) and CoWoS (Chip-On-Wafer-On-Substrate) designs.
- Perform Scan/MBIST/BSCAN insertion.
- Perform ATPG and coverage analysis, simulate zero delay and SDF annotated test sequences.
- Build verification test benches and write verification sequences.

- Review static timing analysis reports and SDCs generations.
- Design and implement automation using Perl and/or Python.

Why would you want to join our team:

Ability to get exposure to all disciplines of TEST (DFT, ATPG, RTL, DV, Device Bring-up) in IC design process.

No “side kick” tasks; you will be assigned a regular engineering scope of work.

High possibility to get absorbed as the full-time engineer after internship subjected to performance and open positions.

Qualifications

Pursuing or Completed Bachelors or Master in

Electronics/Electrical/Telecommunications/VLSI/Microelectronics Engineering only with 70% throughout in academics and zero active backlogs.

Required skill set:

- o Strong Digital Fundamentals
- o Verilog and/or VHDL knowledge
- o Basics of DFT and exposure to Tessent/Synopsys TEST tools is a plus.
- o Perl, Python, TCL experience
- o C/C++, System Verilog is a plus.

Desired Qualities

- o Self-starter and curious to learn new things.
- o Target oriented and motivated to figure out solutions to new problems.
- o Collaborative, team player

Internship Details:

- **Eligibility:**
BTech/MTech in **Electronics, Electrical, Telecommunications, VLSI, or Microelectronics Engineering**
- Minimum **70% academic score** throughout No active backlogs
- **Position:** Intern
- **Duration:** 6 months to 1 year
- **Location:** Bangalore/Pune
- **Stipend:**
 - INR 40,000 per month for **BTech** students
 - INR 50,000 per month for **MTech** students

**About Adani Group:**

Adani Group is one of the largest and fastest growing Conglomerate catering to a billion aspirations. The Group is a diversified organization in India with a market cap of over \$133 Bn comprising 6 publicly traded companies. The company is a market leader in multiple sectors like Ports and Logistics, Power, Transmission, Renewables and Gas.

CTC: 6LPA**Eligibility Criteria:**

- Engineering graduates from disciplines across- (B.E./B.Tech.) from within the following different engineering streams (Civil, Electrical, Mechanical, Electronics (C&I), E&C, CS/IT, Industrial)
- Minimum of 60% marks throughout in academics (10th, 12th, and Graduation level till third year) with no history of backlogs throughout the education

Selection Process:

1. Online assessment to evaluate candidates on their cognitive
2. Domain ability followed by a technical and HR interview

**CEAT Tyres**

About CEAT - Founded in 1958, CEAT is one of India's leading tyre brands and the flagship company of the RPG GROUP . Driven by the purpose of helping the world move safely and smartly, CEAT provides world-class products and services across 110+ countries.

Job Role: GET(Graduate Engineering Trainee)

- Functions –Manufacturing , Production
- **Package – 6 LPA** (CTC will be revised post confirmation after 1 yr)
- Location: Nagpur/Mumbai

Eligibility –

- Must have 60% throughout

- B.E./B.Tech – Mechanical, Electronics, Electrical, Instrumentation , Industrial Engineering, or similar background
- 2022 pass outs / 2023 pass outs who have completed their academic credits only

Hexaware

About Us:

At Hexaware, we're not just a global technology and business process services company; we're a community of 31,600+ Hexawarians dedicated to one singular purpose: creating smiles through the power of great people and technology. With a presence in 58 offices across 28 countries, we empower enterprises worldwide to embark on their digital transformation journey with unparalleled scale and speed.

As an employer, we're more than just a workplace. We put our people first, foster diversity and inclusivity, and prioritize their growth through robust learning and development programs. Our Culture is a canvas for innovation as we work toward our shared vision of becoming the world's most loved digital transformation partner.

Exciting, isn't it? Visit www.hexaware.com to join us in embracing the magic of technology, as we passionately advocate for its potential to transform lives today and shape a brighter future. Together, we'll make the digital world a better place.

Role: Quality Assurance (Software Testing)

CTC: 4,00,000 INR per annum on successful completion of Training.

- o Stipend of 15,000 INR per month for 6 months.
- o Service agreement for 3 years in lieu of 2 lakhs.

What are we looking for?

- Good communication skills- Fluent in spoken & written English
- Team player and interpersonal relationship abilities
- High level of energy
- Right Attitude and the ability to thrive in a fast-paced environment
- Should be able to multi – task: ability to prioritize and manage project related activities
- Possess Openness, reliability, punctuality and flexibility at given tasks

Who can Apply-

- Graduation: B.E/B.Tech/MCA
- M.E/M.Tech not eligible
- Passing year: 2025
- Not more than 1 year of Education Gap
- Streams: CSE/IT/ISE/AI/ML/DS/ECE/EEE/Telecommunication (any CS/IT/Circuital allied branches are eligible)
- Mechanical/Civil/allied branches not eligible
- Aggregate till last announced results: 60% or 6 CGPA throughout 10th 12th and UG/PG
- No active Backlogs

Where will you work from:

- Any Hexaware Office Locations in India. Work from Office only – 5 days a week (No Work from Home allowed)
- During Internship students should work out of Hexaware Office location only – 5 days a week (No Work from Home allowed)

Job Location: Mahape, Navi Mumbai, Maharashtra

Hiring Process:

1. Group Discussion
2. Aptitude Assessment

3. Technical Interview

4. HR Interview

ArcelorMittal Nippon Steel India Limited (AM/NS India)

About AM/NS:

ArcelorMittal Nippon Steel India is an integrated flat carbon steel manufacturer- from iron ore to ready-to- market products with an achievable crude steel capacity of 9 MTPA. Our manufacturing facilities comprise of iron making, steelmaking and downstream facilities spread across India. We are a young, dynamic & global organization. We stand out for our commitment on innovation & continuous improvement and are on a mission to create Smarter Steels for a Brighter future. For us, our employees and their development are at the core. We collaborate with Industry experts and work along with the latest technologies. We also ensure our commitment to environmental responsibility, ensuring that our manufacturing processes are sustainable and create impact in the communities we operate.

Our vision is to be a leading and responsible steelmaker creating value for all stakeholders to achieve this vision, we are always looking for dynamic and highly motivated engineering

graduates. As an engineering graduate, you will have the opportunity to work closely with highly experienced professionals of different domains in various innovative projects.

Position: Graduate Engineer Trainee (GET)

Function: Electrical, Mechanical, Chemical, Electronics & Communication, Computer Science, Metallurgy, Mining

Location: Any of AM/NS India locations

CTC: Incentives 6 LPA Lakhs per annum + other benefits such as Housing, Medical Insurance, Canteen facility, Travel facility, Hospitalization Coverage, Higher Education support, Mobile Phone Data Card, etc. as per company policies.

Selection Process: Online Test followed by a Technical **and** Personal Interview

Responsibilities:

The Graduate Engineer Trainees will be on a training period for 12 months from the date of joining during which they will be assigned projects within the domain. A GET is designated with the opportunity to work in cutting- edge facilities, contributing to the entire steel manufacturing process. From iron making to downstream operations and crucial role in delivering high-quality steel products to the market. It's a chance to showcase one's expertise and make a significant impact in the industry.

Educational Qualifications/Shortlisting Criteria:

- B.E. / B.Tech (Electrical, Mechanical, Chemical, Electronics & Communication, Computer Science, Metallurgy, Mining) At least 65% throughout the academic career with no active backlogs during at the time of applying for the role.
- 65% & above in SSC
- 65% & above in HSC
- 65% & above in B.E. / B.Tech all semesters
- No live ATKT and no year drop/down.

Behavioral Skills:

- Strong interpersonal, problem solving and project management skills
- Excellent communication and interpersonal skills
- Analytical and data driven to ensure structured approach to a problem
- Ability to work in a highly entrepreneurial environment.
- Willing to relocate to any of AM/NS India locations across any technology.

Solar Industries

1. Position Title: IIoT Intern (Control Room)

Post Duration: 6 Months

Days of Work: 6 days a week (1 day rotational off) & 8 hours Rotational Shift

Internship Type: Paid

Job Location: Solar Plant (Chakdoh)

REQUIRED SKILLS

Programming

Languages: 1. Proficiency in Python, C, CSS, HTML & C++ for developing IIoT applications and scripts.

2. Familiarity with Java or JavaScript is a plus.

Networking:

1. Knowledge of networking protocols (e.g., MQTT, HTTP, CoAP, OPC UA, TCP/IP, Modbus, RS485/422, RS232).
2. Understanding of IP networking concepts and topologies.

Embedded Systems:

1. Experience with microcontrollers (e.g., Arduino, ESP's Raspberry Pi, PLC & SCADA) for prototyping IIoT devices.
2. Familiarity with sensors, actuators, and other hardware components.

IIoT Platforms:

1. Exposure to IoT platforms (e.g., PTC, ThingsBoard, AWS, Azure, Google Cloud) for IIoT solutions.
2. Understanding of IoT platforms (e.g., PTC, ThingsBoard, AWS IoT, Azure IoT Hub) is an advantage.

Cybersecurity:

1. Basic knowledge of cybersecurity principles related to IoT devices and data protection.

Version Control:

1. Familiarity with version control systems, especially Git, for collaborative coding.

EDUCATION REQUIRED

1. Completed a degree in Computer Science, Electrical, Electronics, Information Technology, or a related field.

Machine Learning:

1. Familiarity with basic machine learning concepts and frameworks (e.g., TensorFlow, scikit-learn) for predictive analytics in IIoT applications.

Soft Skills:

1. Strong problem-solving abilities and analytical thinking.
2. Excellent communication skills for collaborating with cross-functional teams.
3. Eagerness to learn and adapt to new technologies and challenges.

2. Position Title: IIoT Intern (Field)

Post Duration: 6 Months

Days of Work: 6 days a week (1 day rotational off) & 8 hours Rotational Shift

Internship Type: Paid

Job Location: Solar Industries India Limited (Chakdoh Plant)

REQUIRED SKILLS

- Industrial Automation & Control Systems
 1. Knowledge of PLC programming for IIoT integration (Siemens, Rockwell, Schneider, Delta).
 2. Understanding of HMI, SCADA, and DCS for real-time monitoring.
 3. Familiarity with industrial sensors, transducers, and actuators.
 4. Experience with Modscan, Modsim, or similar diagnostic tools is a plus.
- Communication Protocols & Networking
 1. Basic understanding of IoT & IIoT architecture.
 2. Familiarity with industrial communication protocols:
 3. Modbus TCP/RTU, OPC UA, MQTT, HTTP, CoAP, Ethernet/IP, RS485/RS232.
 4. Understanding of IP networking concepts (LAN, WAN, VLAN).
- IIoT Platforms & Edge Computing
 1. Knowledge of IIoT platforms (ThingsBoard, Grafana, PTC ThingWorx).
 2. Exposure to IoT cloud platforms (AWS IoT, Azure IoT, Google Cloud) is a plus.
 3. Understanding of edge computing & gateway devices for IIoT deployments.
- Programming & Data Processing
 1. Basic PLC programming knowledge for industrial automation.
 2. Familiarity with Python for IIoT scripting and data processing is a plus.
- Cybersecurity & OT Security Practices
 1. Awareness of IIoT cybersecurity principles, including data encryption & network security.
 2. Basic understanding of firewall configurations and secure device communication
- Soft Skills & Problem-Solving
 1. Strong analytical and troubleshooting skills for field deployment.
 2. Ability to collaborate with cross-functional teams.
 3. Eagerness to learn and apply new IIoT technologies.

EDUCATION REQUIRED

Education: Degree in Electrical, Instrumentation, Electronics, Industrial Automation, Computer Science, or related fields.

3. Position Title: Data Analyst Intern

Post Duration: 6 Months

Days of Work: Monday to Saturday

Type of Internship: Paid

Job Location: Solar HO, Extension, Nagpur

Eligibility: CS/IT and related fields

ROLES & RESPONSIBILITY:

- Data Collection
- Exploratory Data Analysis (EDA)
- Statistical Analysis
- Assist in building and fine-tuning machine learning models for predictive analytics or classification tasks.
- Test and evaluate models and scripts for performance, accuracy and efficiency.
- Maintain detailed documentation of data analysis processes and methodologies.
- Collaborate with cross-functional teams to understand business objectives and align data analysis efforts accordingly
- Generate regular reports and presentations to communicate analysis results to non-technical stakeholders.

REQUIRED SKILLS:

1. Proficiency in programming languages such as Python and SQL.
2. Familiarity with data manipulation libraries (e.g., pandas, numpy, seaborn, matplotlib) and visualization tools such as Power BI.
3. Hands on knowledge of ML algorithms, Neural Networks and interest in NLP models.
4. Basic knowledge of LLM models and their respective architectures.
5. Strong problem-solving abilities and analytical thinking.
6. Excellent communication skills for collaborating with cross-functional teams.
7. Eagerness to learn and adapt to new technologies and challenges.

Grindwell Norton Limited

Job Role: Summer Intern

Eligible Degree - B.Tech in Mechanical/Industrial and Production

Internship Duration - 2 months

Remuneration - Rs.35,000 for two months

Job Location - Pan India

Eligibility Criteria - 70% throughout in academics

Interview Process - 1) Pre Placement Talk

2) Online Assessment

3) Personal Interview Rounds

Important Note: The shortlisted candidate should be open to relocate anywhere in India.

Job Role - Graduate Engineer Trainee

Degree - B.Tech in Mechanical/Industrial and Production

Probation Duration - 12 months (Mandatory)

Remuneration - Rs. 5.7 LPA

Job Location - Pan India

Bond Details - 2 years from the date of joining. In case the candidate leaves before completing 2 years, he/she will have to pay Rs. 2 lakhs to the company.

Eligibility Criteria - 70% throughout in academics

Interview Process - 1) Pre Placement Talk

2) Online Assessment

3) Personal Interview Rounds

AcmeGrade

Job Role: Business Development Associate

The role is to maximize the efficiency of Practical Oriented Knowledge in Domains of Technology and Management among Potential Clientele Ranging from Undergraduates to Graduates in the field of Engineering and Commerce. AcmeGrade deals with a series of Products and Services that benefits its Customers Practically as well as Academically in their fields of Interest and as a BDA (Business Development Associate), You are expected to find Potential Clients that fits the description, understand their difficulties, find their passion and interests and guide them to understand how AcmeGrade can help them cross their hurdles and reach their goal through AcmeGrade's platform.

Stipend: Rs. 18,000/- per month

CTC: 4 to 6 LPA (on successful FTE)

Location: Bangalore

Eligibility: All B.E / B. Tech / BBA / MBA and Other Branches.

3. Critical and out-of-the-box thinking.
4. Strong organizational and leadership skills.
5. Ability to perform well under pressure.

Selection Process:

1. Aptitude Test.
2. Group Discussion (GD) Round.
3. Personal Interview (VIRTUAL MODE).

Grappus

About Grappus:

About us:

Equal parts creative agency, engineering firm, and consultancy, Grappus has a reputation of doing things differently. We work with brands big and small, far and wide, helping them understand, prototype and deploy a broad range of custom tech. We value design and we cringe at bad UX. Each project is a clean slate, we don't have frameworks, or any pre-made formulas. We're not here to just grow big, make money and win awards. We're here to crack the process of building truly innovative products from scratch. Products that make people say 'damn'.

People at Grappus usually experience a highly accelerated career growth well beyond the narrow constraints of their 'job description'. Here, the growth ladder is tailored to you. It operates exactly as fast as you can manage to grow. We think it's a waste when smart people are unable to make an impact. Our aim is to unleash your potential by giving you massive challenges and the freedom to solve them.

We're in a fluid world, where we don't know what technologies we'll use next, or the projects we'll work on. We're actively searching for ways to shine a light on our blind spots, whether it is in the products we want to build, the problems we like to solve, or the company culture we try to create. That's what makes life at Grappus so exciting. Grappus is an ongoing experiment and you are a part of it. We'll be a different company a few years from now because you are going to change it for the better. We can't wait to see where you take us

Position: Software Developer

CTC: 5.5 LPA (5+50K Fixed annual bonus)

Eligibility: BCA, B.Tech, BSc CS, MCA, MSc CS & M.Tech (Final Year)

Hiring Process (Every round is an elimination round):

1. Gamified assessment
2. First technical round
3. Second technical round
4. Cultural discussion
5. Final management round

Requirements:

- Should be well versed with concepts of OOPS and data structures
- Should have knowledge of any of the programming languages like C, C++, Java, etc.
- Should be aware of database concepts and types like SQL (MySQL, etc) & NoSQL (MongoDB, etc)
- Should have strong organizational skills to juggle multiple tasks within the constraints on timelines
- Should be keen to learn new technologies and updated about the latest developments
- Should be aware about software development fundamentals, application architecture and design patterns
- The ability to communicate complex procedures to other colleagues

Skills Required:

- Masters/Bachelors degree in Computer Science & IT

- Good written and verbal communication skills
- Understanding of the Software development lifecycle
- Good Analytical and problem solving skills
- Self-motivated with the ability to prioritize, meet deadlines, and manage changing priorities

Benefits:

- We don't track these hours you put in or ask you to fill time sheets. We don't believe in micromanaging, if you're struggling, ask for help. If someone else is, offer some support.
- We never mind if people make mistakes or screw up in any way, and offer full encouragement to help people learn fast by failing fast.
- We always encourage people to be completely candid, raise alarms, or log complaints anonymously in our feedback tool, no matter how harsh.
- We are a 'Work from Anywhere' company, since passionate, driven people can work from anywhere they want; their homes, or cafes, or mountains, or beaches, anywhere.
- We have a 15-day notice period. We want to build a place where people work willingly and passionately.

Cloud 4C

Stryker

Stryker Corporation is one of the world's leading medical technology companies, dedicated to making healthcare better. Founded by **Homer Stryker**, the company has over 75 years of innovation in orthopaedics, medical and surgical equipment, spine, neurotechnology, and robotic-assisted surgery. Stryker operates in more than 100 countries with 25,000+ employees globally and continues to advance precision-driven and patient-focused technologies.

Role: Mako Intern – Orthopedics (Mako Robotics Division)

Internship Duration:

6 Months Training Program

(Internship + Certification Program up to 8 Months)

Career Opportunity:

Candidates successfully completing the certification program will be absorbed as
Associate Mako Product Specialist (FTE)

Job Description: Mako Robotics Internship

The Mako Division focuses on robotic arm-assisted orthopaedic surgery, enhancing surgical precision and patient outcomes. Interns will gain hands-on clinical and technical exposure in robotic-assisted joint replacement procedures.

What You Will Do:

- Provide clinical and technical support to surgeons and OR staff on robotic arm systems and related equipment
 - Prepare and process pre-operative CT scans for implant planning using the RIO/Robotic Arm Interactive Orthopedic System
- Submit case reports, metrics, and complaint documentation as per quality standards
- Manage MAKO equipment, implants, and inventory at assigned accounts
- Support product demonstrations, training sessions, and showsite visits
- Troubleshoot product issues and provide surgical case coverage as require

Who We Want:

- Analytical problem solvers who identify root causes and implement long-term solutions
- Goal-oriented professionals focused on delivering safe and robust outcomes
- Self-driven individuals who take ownership and drive productivity
- Customer-focused individuals with strong accountability

Requirements:

- B.Tech in Biomedical Engineering
- Strong analytical and problem-solving skills
- Good communication and interpersonal abilities
- Willingness to work in clinical/operating room environments

Location: (As per business requirements – typically aligned with hospital accounts and regional assignments)

Eligibility:

Biomedical Engineering graduates

Willing to undergo certification and training program

Interested in robotic-assisted orthopaedic technologies

Philips

Desired Competencies:

- Embedded Systems knowledge
- Electrical Circuits fundamentals
- MATLAB proficiency
- SPICE simulation tools
- Strong Analytical skills
- Problem-solving ability
- Understanding of core engineering concepts

CTC:

- **Graduate Engineer:** 14 LPA
-

Selection Process:

Round 1: Online Aptitude & Technical Test

Round 2: Technical Interview (Core subjects + Projects)

Round 3: Managerial/Technical Discussion

Round 4: HR Interview

Eligibility:

- BE/B.Tech (ECE, Electrical, EEE, Instrumentation or related branches)
- No active backlogs

Sagacious IP

About the Company:

Sagacious IP is an Intellectual Property (IP) consulting firm that provides services such as patent research, prior art search, patent analytics, IP strategy, and technology scouting. The company works with global clients including law firms, R&D organizations, and technology companies to support innovation and protect intellectual property.

Desired Competencies:

- Patent Research & Prior Art Search
 - Analytical & Critical Thinking
 - Data Analysis skills
 - Proficiency in Microsoft Office
 - Strong Written & Verbal Communication
 - Ability to understand and interpret technical documents
-

CTC:

- **Patent Analyst Intern: 3 LPA**
-

Selection Process:

Round 1: Aptitude & Analytical Test

Round 2: Domain Assessment (Prior art search / Case-based analysis)

Round 3: Technical Interview

Round 4: HR Interview

Eligibility:

- BE/B.Tech (All branches; technical background preferred)
- No active backlogs

Solar Industries India Limited

About the Company:

Solar Industries India Limited is one of India's leading manufacturers of industrial explosives and defence products. The company operates in mining, infrastructure, and defence sectors, and is increasingly integrating **automation and Industrial IoT (IIoT)** solutions for smart monitoring and control systems in manufacturing and operations.

Desired Competencies:

- Programming: Python, C, C++, Java, JavaScript
- Web Technologies: HTML, CSS
- Industrial Communication Protocols: MQTT, HTTP, CoAP, OPC UA, TCP/IP, Modbus
- Serial Communication: RS485/422, RS232
- Embedded Systems: Arduino, ESP, Raspberry Pi
- Industrial Automation: PLC, SCADA
- Machine Learning: TensorFlow, scikit-learn
- Strong Problem-solving skills

- Good Communication skills
-

CTC:

- **IIoT Intern (Control Room): 5 LPA**
-

Selection Process:

Round 1: Online Aptitude & Technical Test

Round 2: Technical Interview (Programming + Automation + Projects)

Round 3: Managerial/Technical Discussion

Round 4: HR Interview

Eligibility:

- BE/B.Tech (ECE, Electrical, Instrumentation, Computer, IT, related branches)
- No active backlogs

Zepto

About the Company:

Zepto is an Indian quick-commerce startup operating in the **10-minute grocery delivery** space. It runs a network of dark stores (micro-warehouses) across major cities and focuses heavily on speed, operational efficiency, and technology-driven fulfillment systems. The company operates in the **E-commerce / Quick Commerce / Supply Chain & Operations** sector.

Role 1: Intern – Motherhub Operations

Department: Operations / Fulfillment

Location: Mumbai

Desired Competencies:

- Strong problem-solving & analytical skills
 - Real-time order monitoring using WMS
 - Cross-functional coordination (Inbound, Outbound, Inventory teams)
 - Strong verbal & written communication
 - Knowledge of MS Office tools
 - Ability to work in fast-paced warehouse environment
 - Physical stamina (10–12 hour shifts, lifting up to 20 kg)
 - Preferred: Excel, Google Sheets, Time management skills
-

CTC:

- **Initial 3 Months:** ₹25,000 stipend
- **Post 3 Months:** ₹25,000 retention bonus (CTC remains same)

- **After 6 Months (Performance-based PPO):** 4.5 LPA (Fixed + Variable)
-

Selection Process:

Round 1: Aptitude / Operations Assessment

Round 2: Technical/Operational Interview

Round 3: HR Interview

Eligibility:

- Any Graduate
 - Proficiency in computer systems (WMS, MS Office)
 - Willingness to work in operational/warehouse environment
-
-

Role 2: Assistant Under Training (AUT)

Desired Competencies:

- Good Communication skills
- Excel proficiency
- Leadership & team management skills
- Operations & manpower planning
- Inventory & rider operations management
- SOP implementation & process improvement

- Lean practices (Gemba, Kaizen mindset)
 - Ability to work independently & cross-functionally
-

CTC:

- **During Training (First 6 Months):** As per internship structure
 - **Post Conversion (Performance-based):** 4.5 LPA (Fixed + Variable)
-

Selection Process:

Round 1: Aptitude / Case-based Assessment

Round 2: Managerial/Operations Interview

Round 3: HR Interview

Eligibility:

- Any UG
- BE/B.Tech (Excluding CS & IT)
- MCA
- MBA

Flash Cryogenics

About the Company:

Flash Cryogenics operates in the **Cryogenic Engineering and Industrial Gas Systems** sector. The company works on low-temperature systems, cryogenic storage, pressure vessels, and flash evaporation technologies used in industrial and scientific applications. It focuses on designing safe and efficient cryogenic infrastructure.

Desired Competencies:

- Basic knowledge of Flash Evaporation and Cryogenic Systems
 - Strong fundamentals in Thermodynamics
 - Strong fundamentals in Heat Transfer
 - Understanding of low-temperature fluid behavior
 - Knowledge of pressure vessels and insulation systems
 - Awareness of safety standards in cryogenic operations
 - Basic proficiency in AutoCAD or CATIA (preferred)
-

CTC:

- **Graduate Engineer / Technical Role: 7 LPA**
-

Selection Process:

Round 1: Technical Written Test (Thermodynamics + Core Mechanical Concepts)

Round 2: Technical Interview (Core + Projects discussion)

Round 3: HR Interview

Eligibility:

- BE/B.Tech (Mechanical, Chemical, Production or related branches)
- Strong core subject knowledge
- No active backlogs

Avaada Group

About the Company:

Avaada Group is an Indian renewable energy company operating in the **Solar Energy, Green Hydrogen, and Sustainable Infrastructure** sector. The company develops and operates large-scale solar power plants and is actively expanding into green hydrogen and energy transition projects across India. It focuses on clean energy generation and sustainable industrial solutions.

Desired Competencies:

- Strong fundamentals in core engineering subjects (as per discipline)
- Basic understanding of Renewable Energy systems
- Knowledge of Solar PV technology
- Basic understanding of Green Hydrogen concepts
- Knowledge of power plant operations / energy storage systems / industrial processes (preferred)
- Proficiency in AutoCAD, CATIA, or SolidWorks (Mechanical)
- Basic knowledge of electrical systems, PLC, and SCADA (Electrical / E&E)
- Understanding of PFD, P&ID, and plant operations (Chemical)
- Strong analytical and problem-solving skills
- Good communication and teamwork abilities
- Willingness to relocate to project/plant sites
- Adaptability and eagerness to learn

CTC:

- **Graduate Engineer Trainee (GET): 5 LPA**

Selection Process:

Round 1: Online Aptitude & Technical Test
Round 2: Technical Interview (Core + Projects discussion)
Round 3: Managerial/HR Interview

Eligibility:

- BE/B.Tech (Mechanical, Electrical, E&E, Chemical or related branches)
- No active backlogs
- Willingness to work at project sites

Tata Advanced Systems Limited

About the Company:

Tata Advanced Systems Limited (TASL) operates in the **Aerospace & Defence manufacturing sector**. It is part of the Tata Group and works on aircraft structures, aerospace components, defence systems, unmanned platforms, and high-precision engineering solutions. The company collaborates with global aerospace leaders and focuses heavily on advanced manufacturing, design engineering, and quality systems.

Desired Competencies:

- CAD Software: CATIA, SolidWorks, AutoCAD
- FEA Tools: ANSYS / HyperMesh
- GD&T (Geometric Dimensioning & Tolerancing)

- Strong Engineering Drawing reading skills (Very Important)
 - MS Excel (Advanced formulas)
 - Basic knowledge of SAP
 - Basic MATLAB coding knowledge
 - PLM (Product Lifecycle Management) software knowledge
 - Strong analytical and problem-solving skills
-

CTC:

- **Graduate Engineer / Core Role: 5 LPA**
-

Selection Process:

Round 1: Technical Written Test (Core + CAD/Design concepts)

Round 2: Technical Interview (Design, FEA, GD&T, Projects discussion)

Round 3: HR Interview

Eligibility:

- BE/B.Tech (Mechanical, Production, Aerospace or related core branches)
- Strong fundamentals in design and manufacturing
- No active backlogs
